RECON

MOUNTAIN SCOPE

RECON
MOUNTAIN SCOPE

Built to handle the roughest conditions, this compact scope is designed to provide glassing ability in a quick handling, lightweight package. The Recon scope offers brilliant optical performance using Vortex's premium XD glass and XR lens coatings.

Using a unique modular design with Picatinny rails, the Recon permits almost unlimited options in accessory attachment and hand placement. The clip allows rapid attachment and detachment—and can be positioned in one of three locations.

Accessories

Included with the Recon Scope

Rain/dust hood

Uni-Daptor tripod adapter

Tripod

Tethered objective lens cover

Picatinny rail

Other accessories available from Vortex Optics

2x Doubler

Low light polarizing filter

killFLASH® ARD

Extra Picatinny rail

Lens cleaning kit

Extra Uni-Daptor base

Basic Operation

Adjusting the Image Focus

Use the main focus wheel on the eyepiece to obtain crisp, sharp images of objects at varying distances.

Designed for quick operation, simply place the thumb and forefinger on the focus wheel and turn to move lens forward or backward until the image is as sharp as possible.

Adjusting the Eyecup

The adjustable eyecup on the Recon scope is designed to accommodate both eyeglass wearers and non-eyeglass wearers.

- Keep the eyecup fully extended when viewing without eyeglasses.

- Twist the eyecup down when viewing with eyeglasses.

Carrying with the Clip

Depending on user preference, the clip can be positioned in several locations. This versatile carrying option allows quick attachment of the Recon scope to pocket edges, equipment or other field locations.

Lanyard

Thread the lanyard on one of the built-in loops of the Recon scope. The lanyard can be worn around the neck, or used as a safety cord when carrying the scope with its clip.

Picatinny Rail

This allows quick attachment of any accessory using the standard Picatinny rail clamp—attach the rail on either side of the Recon scope.

Recon Tripod

The Recon comes with an ultra-compact field tripod which may be used to steady the Recon while observing or ranging small objects. Thread the Recon directly onto the tripod—the flexible legs adapt to a wide range of surfaces.

For added height and a quick-release option, attach the Recon to the tripod with the quick-release Uni-Daptor.

1. Attach the base unit of the Uni-Daptor to the tripod mounting plate.
2. Attach the post unit to the Recon by threading the 1/4x20 stud into tripod socket on the scope.

When not using the tripod, fold the post of the Uni-Daptor alongside the length of the Recon and continue viewing.

Hand Strap

The padded handstrap can be positioned on the left or right side of the Recon scope according to the user's preference.

Rain/Dust Hood

The easy slip-fit design helps keep ocular lenses free of moisture and dust. To attach or detach, simply slide attachment slit over the end of the clip. The hood can then be pulled off and on over the eyepiece.

Case

The Recon scope comes with a soft case which may be attached to articles of gear or clothing using MOLLE straps or the built-in belt loop.

Objective Lens Cover

Cover and protect the objective lens with the tethered cover.

Maintenance

Protect Lenses

The neoprene hood protects the ocular lens from rain and dust when not actively viewing through the Recon. The Recon carry case provides extra protection for the scope.

If the optics are exposed to moisture, keep the caps off and allow the optics to dry out completely before putting them in the case for storage.

Keep Lenses Clean

When cleaning lenses, be sure to use products, like those in Vortex lens cleaning kits, that are specifically designed for coated optical lenses.

- Be sure to blow away any dust or grit on the lenses prior to wiping the surfaces.
- Using your breath, or a very small amount of water or pure alcohol, can help remove stubborn things like dried water spots.

Other cleaning options

Cleaning fluid and optical paper can also be used. However, you should never use facial tissue, heavy cotton, or flannel clothing on lenses—these materials can scratch the lens surfaces.

Vortex Service and Repair Policy

Unconditional Lifetime Warranty

Vortex Optics wants you to use your Recon Mountain scope under any conditions with complete confidence—that's why our warranty is straightforward and simple:

- Fully transferable
- No warranty card needed
- No receipt needed

Unconditional Lifetime Warranty

Rest assured, if this scope should ever require repair, all you need to do is contact Vortex for absolutely free service. Call 800-426-0048 or e-mail service@vortexoptics.com.
