

Aimpoint®

3XMag™

The Aimpoint 3XMag magnifying module is specially designed for use with Aimpoint sights and offers the shooter the ability to engage targets at extended ranges. When combined with Aimpoint's patented Twist-Mount, the 3XMag gives the shooter something never before possible — the ability to switch from CQB (Close Quarters Battle) to semi-sniping and back with a flick of the wrist. The 3XMag is ideal for perimeter security and sniper support missions. The versatile 3XMag can also be used as a handheld magnifying monocular for discrete observation and target identification.

Unique features of the 3XMag™

- Ready to mount behind Aimpoint sights
- Provides extended engagement range to the operator
- Combines the best of two worlds, CQB and semi-sniping
- Increases confidence, performance and flexibility
- Extremely fast on/off quick change mounting solution
- Mounting and dismounting the magnifier has no influence on point of impact of your sight. No need to re-zero the sight after changing magnifier.
- Internal adjustments allow centering the magnifier to your sight.
- Rubber armor increases ruggedness.
- Drilled and tapped for use with other accessory mounts.
- Spacer available to accommodate a wide variety of weapons.
- Doubles as handheld 3X monocular
- May also be used as an accessory with sights from other manufacturers.

THE FUTURE IN SIGHT.

Optical System

Magnification	3X
Objective diameter	20 mm
Field of view (FOV)	7°
Exit pupil diameter	7 mm

Physical Specifications

Dimensions, L x W x H	110 mm x 44 mm x 41 mm (4.3" x 1.7" x 1.6")
Weight	200 g (7.1 oz) including rubber cover
Material housing	Anodized aluminum, dark grey, rubber covered black

Environmental Specifications

Temperature range	-45° C to +70° C, (-50° F - +160° F) in operation and storage
Humidity	0 – 100% condensing or non-condensing
Water resistance	Submersible to 20 m (67 ft)

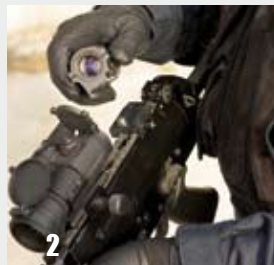

Mechanical interface

The 3XMag is provided with a 30 mm diameter tube (for mounting) and with 4 screw holes in the bottom surface for other mounting alternatives. The recommended mount for the 3XMag is the Aimpoint Twist Mount, which allows for quick attachment and detachment. The Aimpoint TwistMount fits any MIL-Std 1913 Picatinny Rail.

From CQB to semi-sniping capability and vice versa in a split second

1. CQB capability 2. Place the 3XMag on the TwistMount base
3. Turn clockwise into its final position 4. Semi-sniping capability

M00490

When we at the Danish Counter Terrorist Unit (AKS) equipped our Diemaco C8 rifles with Aimpoint CompM2 sights, we also equipped them with 3XMag magnifying modules. We have found that this is a very useful tool in combination with the CompM2 sight. In a hostage situation we can shoot very accurately at distances ranging from 50 m to 150 m and a split second later, thanks to the quick release feature of the TwistMount, we can use our weapon in other situations. We can also identify a threat at quite long distances both with the 3XMag mounted on the weapon or as a hand held magnifying tool..
