

**THE RIMFIRE AND AIRGUN SCOPE MOUNT SPECIALISTS**

# YOUR RIMFIRE & AIRGUN MOUNT SPECIALIST

Finish off your latest rimfire or airgun & scope acquisition with mounts from BKL designed to fit any standard 3/8 inch rimfire or 11mm airgun dovetails.

The strong one piece clamping base allows easy mounting of 1 inch and 30mm rifle or pistol scopes.

Patented Auto-Centering™ technology solves the problems created by varying mounting rail widths. Clamping legs move equally as the clamping screws are tightened keeping the scope centered on the rail.

## AUTO-CENTERING™ STANDARD ON ALL SERIES

Oversize mounting rails are no problem, the clamping screws can be switched to spreader holes to evenly push the clamping legs apart and allow the mount base to slide onto the dovetail.

Airgunners and Rimfire shooters can now also benefit from the multitude of Picatinny rail mounted optics and accessories with our Weaver/Picatinny to dovetail adaptor mounts.

BKL mounts are manufactured from aircraft grade aluminum alloy on state of the art machinery in Texas. They can be purchased at your local retailer and online at [www.bkltech.com](http://www.bkltech.com).
