Hunting Spotting Scopes

April, 2020

GENERAL FEATURES OF SPOTTING SCOPES SUITABLE FOR HUNTING

Hunting

*Activity involving seeking, pursuing and harvesting of **wild animals** in the **nature***

Hunting spotting scopes properties:

- Smaller size, light weight
- **50mm – 70mm** objective lens diameter
- **10x – 20x** minimal magnification
- **35x – 50x** maximal magnification

SPOTTING SCOPES VS BINOCULARS FOR HUNTING

Hunting spotting scopes

- Better observation of **details** → age, gender, trophy
- Can not be used without binoculars

Binoculars

- More comfortable and easy to use (can be used handheld)
- Better for panning of surrounding
- Great for **glassing** → *The act of searching for animal from vantage point or position*

SPOTTING SCOPES FOR HUNTING IN FLAT LANDS

- Best choice for hunting in the flat lands and on the fields are straight spotting scope
- Hunting in flat lands can be performed:
- In a **car** → with installed mounts to the window of a car
- In **raised hides** → observing animals by leaning on the edge of the raised hide

SPOTTING SCOPES FOR HUNTING IN THE MOUNTAINS

- Angled spotting scope have **45°** or **90°** angled eyepiece
- No need to overstretch neck while using it
- Can be used without a tripod → hunter puts the scope on the top of a shoulder bag

EXPANDABLE SPOTTING SCOPES FOR HUNTING

- Body of the scope can be **folded**
- Used only by hunters and pirates
- Very **compact** and light **weighted**
- Downside: lack of **waterproofness**
- Popular among hunters in the mountains because of tradition (**Swarovski**)
