CUTTING-EDGE TECHNOLOGY

FOR PERFECT VIEWING, COMPETENCE CERTIFIED
BY PROGRESS

Since the invention of the famous spy camera, the MINOX brand is known all over the world as a synonym for the perfect miniaturization of top of the line technology.

Even today, MINOX is equally well known for their outstanding innovative drive in the field of sport optics. This reputation is reflected in the development and production of compact and high-quality binoculars, now coveted by those who love the wilderness.

Maximum priority is given to design and manufacturing to provide cutting-edge technology for perfect viewing. The result is premium quality optics and high functionality to meet the highest of demands.

Without compromise, MINOX binoculars are extremely robust, reflecting the solidity and longevity typically found in German engineering skills. Experience the world at first hand with the clarity, solidity and excellent handling typical for MINOX binoculars.

Your MINOX Team

HG SERIES

UNCOMPROMISING QUALITY "MADE IN GERMANY"

MADE IN
GERMANY

Our German engineers designed High Grade Sport Optics aimed at the best possible performance in all areas. The optical system of the HG series provides a fascinatingly high light transmission, gaining top marks for brightness and contrast.

- Brilliant optical performance
- MinoBright® prism coating for high light transmission
- M* lens coating for a bright image
- Extremely sharp image
- Special optical high-tech glass
- Large field of view
- Lightweight magnesium body
- Quick Close Focus for a smooth transition from close to long range focussing
- Scale for distance estimations
- Waterproof down to 5 m and argon gas purged to prevent fogging
- Eyecups with four click-stops – ideal for eyeglass wearers

Available as:

HG 8x33 / HG 8x43 / HG 10x43
HG 8.5x52 / HG 10x52 / HG 8x56
APO HG 8x43 (top quality ED glass)
APO HG 10x43 (top quality ED glass)

BL HD SERIES

COMFORTABLE. LIGHTWEIGHT. HD.

MADE IN
GERMANY

MINOX BL HD binoculars are characterised by their distinctive lightweight design and open bridge, enabling a comfortable one handed operation. The BL HD series with its innovative anomalous partial dispersion HD glass provides an image free from disturbing colour fringes or glare.

- Excellent optical performance
- High quality and high performance HD optics for improved colour rendition and higher transmission
- M* lens coating for a bright image
- High resolution, neutral colour rendition
- Open bridge for secure one-handed operation and perfect grip
- Lightweight, compact and robust housing
- Turnable eyecups – ideal for eyeglass wearers
- Wide field of view (up to 153 yds / 140 m with the BL 8x33 HD)
- Waterproof down to 5 m and argon gas purged to prevent fogging

Available as:

BL 8x33 HD

BL 8x44 HD / BL 10x44 HD

BL 8x52 HD / BL 10x52 HD

BL 8x56 / BL 15x56

LIGHTWEIGHT AND POWERFUL BINOCULARS

MADE IN
GERMANY

The perfect companion for observing wildlife in low-light situations. Weighing just over 35 ounces, these binoculars are perfectly suitable for extended use in the field. The BL 15x56 is ideal for observing objects at long distances.

- Excellent optical performance
- M* lens coating for a bright image
- High resolution, neutral colour rendition
- Turnable eyecups – ideal for eyeglass wearers
- Waterproof down to 5 m
- Argon gas purged to prevent fogging
- BL 15x56 comes with a tripod adapter
- Wide carrying strap

Available as:

BL 8x56

BL 15x56

BV SERIES

POWERFUL ALLROUND BINOCULARS.
GERMAN ENGINEERING.

The MINOX BV series binoculars are particularly characterised by their perfected optical performance, rugged and grippy body, and high reliability even in harsh situations. Excellent binoculars for wildlife observation in any environment.

- Highly optimised optical performance
- M* lens coating for a bright image
- Neutral colour rendition
- 8x or 10x magnification for distant objects
- Non-slip, sturdy aluminium body
- Turnable eyecups - ideal for eyeglass wearers
- Waterproof down to 5 m and nitrogen gas purged to prevent fogging

Available as:
BV 8x25 / BV 10x25
BV 8x42 / BV 10x42
BV 8x56

MD 62

EXPERIENCE THE FASCINATION OF FINEST DETAILS

When binoculars do not offer the magnification needed in the field, the MINOX MD 62 spotting scopes are the perfect substitutes for discrete observations of distant objects. The MD 62 ED spotting scopes feature state-of-the-art fluoride glass to guarantee absolutely neutral colour rendition and excellent light transmission.

- High contrast and natural colour rendition
- ED models feature fluoride glass with apochromatic colour correction
- M* lens coating for a bright image
- From 20x to 45x magnification
- Exchangeable eyepiece
- Straight or angled (W) body
- Nylon protective case for easy handling
- Waterproof down to 5 m and argon gas purged to prevent fogging
- Weighs only 930 g

Available as:

MD 62 / MD 62 ED
MD 62 W / MD 62 W ED

Variable eyepieces:

20-45x, 21-42x

MD 50

THE EXTREMELY COMPACT SPOTTING SCOPE

The unusually compact design, variable power optical system and high precision mechanics are characteristics of the MD 50 and MD 50 W spotting scopes revered by wildlife specialists around the globe. With a magnification range of 15x to 30x, these spotting scopes are ideal for use in any situation.

- High contrast and natural colour rendition
- M* lens coating for a bright image
- From 15x to 30x magnification
- Straight or angled (W) body
- Turnable tripod mount
- Waterproof down to 5 m and nitrogen gas purged to prevent fogging
- Weighs only 660 g

Available as:

MD 50
MD 50 W

MS 8x25 MACROSCOPE™

THE HIGH-PERFORMANCE MINI TELESCOPE FOR CLOSE AND FAR

MINOX COMFORT SERVICE

OUR QUALITY PROMISE FOR THE NEXT 30 YEARS

More assurance and service for your MINOX product even after the statutory warranty has expired: After the product registration MINOX customers take advantage of the MINOX Comfort Service. This service will be offered to MINOX customers for 30 years after the date of purchase.

The extended **MINOX Comfort Service** warranty applies to all products in this brochure indicated by the Comfort Service logo.

The extremely close-focus distance of only 35 cm (14 in.) and 8x magnification make the MINOX MS 8x25 the perfect pocket-sized telescope for use at concerts or for observing insects and flowers at close range. With a field of view at over 110 m (120 yds.), it is the perfect tool for observing distant objects and can even be used as a visual aid for the sight impaired.

- 8x magnification
- Close-focus distance of 35 cm (14 in.)
- M* lens coating for a bright image
- Turnable eyecup - perfect for eyeglass wearers
- Dust and waterproof
- Argon gas purged to prevent fogging
- Dimensions: 92 x 57 x 44 mm (3.6 x 2.2 x 1.7 in.)
- Weighs only 150 g
