

# Hunting Optics 2015

# THE GREATEST FAMILY IN HUNTING.

## Our Product Families Keep Growing!

Families have been a vital part of America's hunting heritage for ages. The passion that is passed from one generation of hunters to the next is fueled through good times with family and friends, a connection with nature and, ultimately, through success in the field. Nikon's family of hunters has grown dramatically over the years through its dedication to providing hunting optics and technologies that are not only useful and relevant, but that help assure hunting success. Through the pages of this catalog you will see some of the pro staff who make up Nikon's extended hunting family. But rest assured that it is the faces of millions of family members such as yours to which Nikon owes its continuing success. From our family to yours... Thank you... Now, Let's Hunt!

## MONARCH 5 Riflescopes

The flagship MONARCH family of riflescopes has grown once again with the introduction of the new MONARCH 5 lineup. With 5x zoom capability, ED Glass lenses and the breakthrough Advanced BDC reticle, the MONARCH 5 will find its place on many rifles for 2015 and beyond.

## PROSTAFF 7 Riflescopes

The PROSTAFF 7 is definitely the big brother to the workhorse PROSTAFF riflescope clan. With a 30mm main body tube, the PROSTAFF 7 offers a massive adjustment range for those long range hunters and shooters who need the additional elevation setting.

## BUCKMASTERS II Riflescopes

Celebrating its 18th season in deer camps across America, the BUCKMASTERS line is once again in Nikon's new product lineup. Two new BUCKMASTERS models for 2015 are introduced with fully multicoated optics, Nikon ruggedness, BDC reticles and other must-have features.

## PROSTAFF 7i Laser Rangefinder

While its name is the PROSTAFF 7i, its DNA is packed with 1,300 yards of speed and precision. With a host of Nikon Technologies including HYPER READ, Tru-Target Ranging, ID Technology and 1/2-yard accuracy capability, the PROSTAFF 7i is a small handful of performance suited to any hunting situation..

## S-Series and A-Series Scope Mount Systems

Once you've selected your new Nikon riflescope, consider keeping it all in the family with a new S-Series or A-Series mount system. Strong, precise and reliable, Nikon scope mounting systems are the right way to finish-off your hunting rig.

## PROSTAFF RIMFIRE II Riflescopes

For all those rimfire enthusiasts who have been buying-up ammo for a rainy day, your forecast is in. The new PROSTAFF RIMFIRE II riflescopes in 3-9x40 and 4-12x40 are your best excuse to break out that ammo and see how capable your trusty .22 really is.

## P-308 Riflescope

Enthusiasts of precision .308 rifle shooting, whether bolt action or AR platform, can look forward to this new addition to Nikon's caliber-specific optic family of riflescopes. The new P-308 4-12x40 with BDC 800 reticle promises to deliver on its promise of speed, precision and overall riflescope performance..

## P-223 Riflescope

The P-223 line adds another carbine-style variable power scope for 2015—the new 1.5-4.5x20. Featuring the BDC 600 reticle, this new compact optic is equally capable for match or field use.

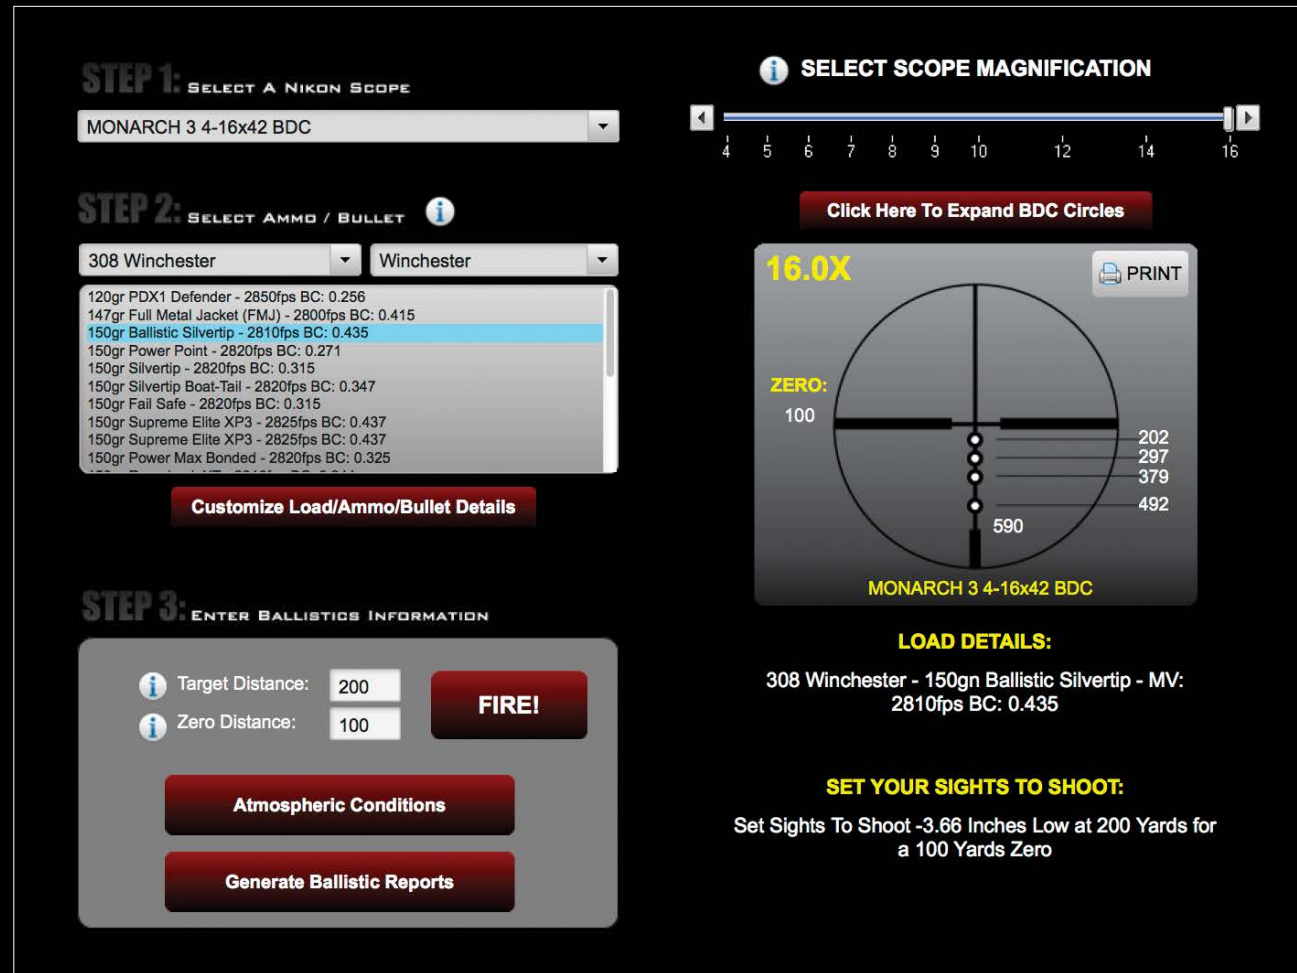

Nikon No-Fault Repair/Replacement Policy for Binoculars, Riflescopes and Fieldscopes.  
Nikon is dedicated to quality, performance and total customer satisfaction. If your Nikon Binocular, Rifle scope or Fieldscope requires service or repair not covered by our Limited Lifetime Warranty, just send it to us and Nikon will repair or replace it.

Nikon stands behind its products by offering the best consumer protection in the shooting sports industry. At Nikon, we believe the best warranty is one you'll never have to use. For this reason, we crafted the Nikon Lifetime Warranty, which provides confidence on those rare occasions when something goes wrong. If any Nikon rifle scope, binocular or Fieldscope is found to have defects in workmanship or materials, we will, at our option, repair or replace it at no charge. This warranty extends to the original consumer purchaser only and is not assignable or transferable. No time limit applies.\*  
\* 1-year warranty on electronics  
Nikon Inc. warranties and no-fault policy cover products marketed and sold in the U.S.A.

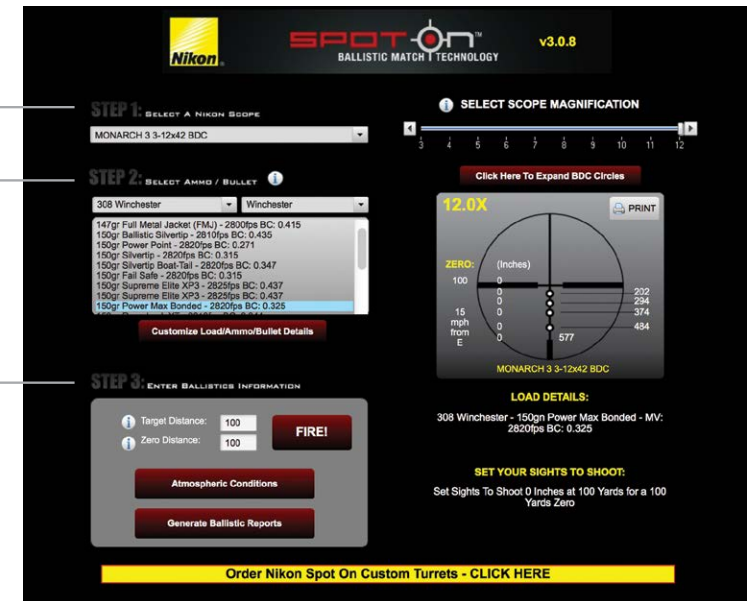

## Unlock Your Firearm's Accuracy Potential!

## Match Your Nikon Riflescope to Virtually Any Ammunition!

Simple to Use:

- 1 Choose your riflescope and reticle
- 2 Choose your ammunition
- 3 Enter your sight-in and target distances and fire

**You Can Further Customize Your Spot On Results.**

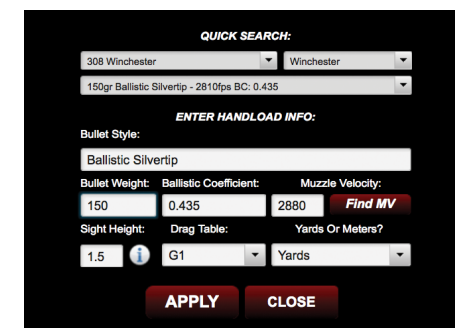

## Customize Your Shooting Environment

Enter atmospheric conditions and other data that can affect your shot.

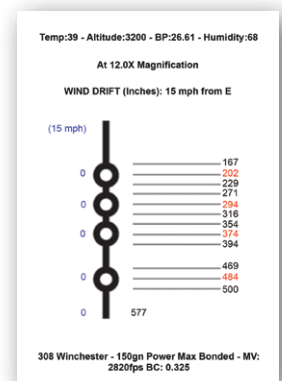

## Spot On for Handloaders

Enter your custom load information and Spot On does the rest. You can even compare loads.

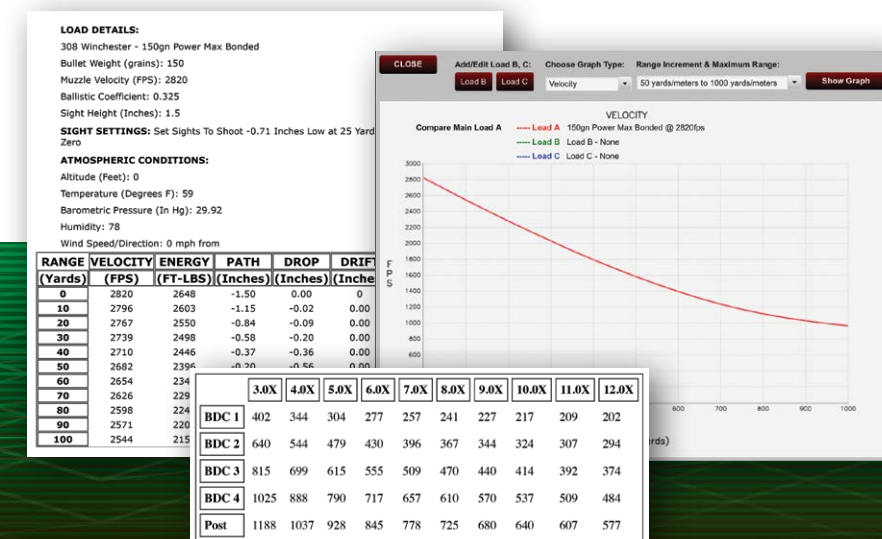

## Expand Your BDC Reticle

See incredibly precise reticle aiming points, download and print. Tape it to your stock for easy reference.

## Generate Ballistic Data Reports

You can create Field Reference Charts, Ballistic Tables and Ballistic Trajectory Graphs of your particular load.

### Mobile App

Spot On is available for the iPhone®, iPad® and Android™ platforms. Purchase the app and ensure that the world's hottest ballistics calculator is there when you need it.

## GIVE IT A SHOT!

NikonSportOptics.com/SpotOn

**CUSTOM**  
**XR**  
**TURRET**™

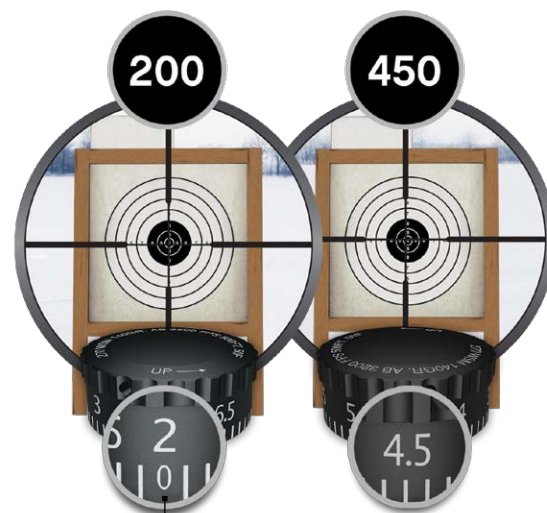

Take control of long range shooting with precise, easy-to-use ballistic technology developed specifically for today's hunters and shooters.

## CUSTOM XR TURRET Riflescopes

Nikon riflescopes equipped with Custom XR Turret technology feature a Ballistic Compensation System that pairs the Nikoplex reticle (BDC in MONARCH 7) with a custom engraved elevation turret based upon a shooter's unique cartridge and environmental data. This made-to-order elevation turret dial replaces the factory MOA turret that comes with your Nikon Custom XR Turret riflescope. As a result, you can dial-in your shooting range and hold your crosshair directly on your target for every shot—providing speed, precision and intuitive simplicity. Everything you need to help you master your long shot!

Redemption voucher for your Custom package comes with each rifle scope. You can also order additional turrets to match additional loads, velocities or extreme environmental conditions.

The engraved Custom XR Turret will be shipped to you indicating yardages based upon your specific cartridge and environmental data. Just hold directly on target and dial up or down to match your range.

RTZ: Return To Zero

The Custom XR Turret also integrates a Return to Zero stop that prevents you from dialing down past your "0" (for instance, if you specified a 200 Yard zero, the RTZ feature prevents dialing below 200 yards.)

Ordering a Custom XR Turret is simple. Just enter your Custom XR Turret riflescope model, your cartridge and environmental data and your custom turret will be made to your unique specifications.

## FEATURES

## MONARCH 7

The MONARCH 7 Custom XR Turret models are truly the flagship of the Nikon line. Each features a 30mm main body tube, glass-etched reticle and side focus parallax adjustment. Not only are they Custom XR Turret compatible, they also feature Nikon's BDC reticle. This dual ballistic compensation system gives you the option to either dial-in the distance on the crosshair or utilize the holdover points on the Spot On optimized BDC reticle. See Page 9 for additional MONARCH 7 features.

MONARCH 5

The MONARCH 5 Custom XR Turret riflescope brings Nikon's legendary ED (Extra-low Dispersion) Glass and an incredible 5-time zoom ratio to the American hunter. The MONARCH 5 Custom XR Turret riflescope will keep you on target at long distances through total customization with your own Custom XR Turret for dialing in the distance. See Page 11 for additional MONARCH 5 features.

**MONARCH 3**

Thanks to Nikon's Ultra ClearCoat® Optical System, MONARCH 3 Custom XR Turret riflescopes offer superior light transmission – especially during those peak low-light hunting hours near dawn and dusk. There are three different Custom XR Turret models to choose from, each with a Nikoplex reticle, so find the magnification you like best and dial-in your next shot with a MONARCH 3! See Page 13 for additional MONARCH 3 features.

## PROSTAFF 5

PROSTAFF 5 Custom XR Turret riflescopes bring dial-in performance to your favorite rifle. There are three different magnifications to choose from and each one has a Nikoplex reticle, 4x zoom ratio, a quick focus eyepiece and Nikon's Fully-Multicoated optical system. See Page 17 for additional PROSTAFF 5 features.

### Choice of Coarse or Fine Knurling

Nikon Custom XR Turret made-to-order elevation turret dial with Return to Zero feature—in choice of Coarse or Fine Knurling—that replaces the factory MOA turret.

# MONARCH 7

## Flagship Performance

With its Selective Ballistic Compensation System, MONARCH 7 puts both Nikon's Spot On optimized BDC reticle and Custom XR Turret system at your command for instant, repeatable control over the trajectory of every shot. Oversize 30mm main body tube, glass-etched reticle and increased diameter interior lenses offer an exceptionally bright, crisp sight picture and an enhanced field of view. MONARCH 7 Custom XR is the future of long range shooting and heir to Nikon's 97-year legacy of uncompromising performance.

### Selective Ballistic Compensation System

BDC Reticle

CUSTOM XR TURRET

Trust the precise holdover points provided by Nikon's exclusive Spot On optimized BDC reticle for virtually any range.

Dial-in the shot with custom engraved turret based upon your specific cartridge and environmental data.

### FEATURES

#### Ultra ClearCoat® Optical System

Nikon has engineered the entire optical system to provide the shooter with a bright, sharp, and clear sight picture from dawn to dusk.

#### Rugged, One-Piece 30mm Main Body Tube

Engineered for minimum weight and maximum strength and durability, Nikon builds these scopes from aircraft grade aluminum alloy and utilizes larger internal lenses for maximum resolution. Larger tubes allow for the best resolution, wider windage and elevation travel, and superior low-light performance.

#### Selective Ballistic Compensation System

MONARCH 7 riflescopes feature a glass-etched BDC reticle, plus the Custom XR Turret package – so you have the option on every shot to either dial-in your distance on the crosshair, or to utilize the holdover points on the BDC reticle.

#### Glass-Etched BDC Reticle

The various aiming points built into the BDC reticle can be utilized with Nikon's Spot On Ballistic Match Technology to give you exact aiming points at various yardages. Take the guesswork out of figuring elevation and bullet drop compensation.

#### Custom Engraved Elevation Turret to Match Your Load

The Custom XR Turret allows you to custom match the distances inscribed on the elevation dial to the specific ballistics of your load and environmental conditions. As a result, you can dial-in your exact shooting range and hold your crosshair directly on your target for every shot.

#### MONARCH Eye Box Technology

Keeps your brow safe—even with the heaviest recoiling cartridges, lightweight rifles, and severe shooting

angles. Every model features an impressive 4-time zoom range and up to four inches of non-critical eye relief. A massive ocular lens delivers a huge, exceptionally bright, high-resolution sight picture.

#### Side-focus parallax adjustment

Turret mounted knob allows adjustment without changing shooting position.

#### Smooth Zoom Control

For quick magnification changes.

#### Waterproof/Fogproof/Shockproof

Nitrogen filled and O-ring sealed. Built for heavy recoil and rugged use.

#### Sunshade and Additional Windage Turret Included

# MONARCH 5

## Advanced Technology and Precision

The MONARCH 5 is one of Nikon's most advanced riflescope lines to date. Experience the combined performance of Nikon's legendary ED (Extra-low Dispersion) Glass, a glass-etched Advanced BDC Reticle, and an incredible 5-time zoom ratio. The MONARCH 5 will keep you on target at long distances. Use Spot On Ballistic Match Technology to find the exact aiming points on the Advanced BDC reticle and any one of these riflescopes will help make your next shot a successful one.

**SPOT-ON™**  
BALLISTIC MATCH | TECHNOLOGY

OPTIMIZED

**ED**  
**GLASS**

## FEATURES

### ED (Extra-low Dispersion) Glass

The optical system in the MONARCH 5 riflescope line is second-to-none and features Nikon's ED Glass lenses that reduce chromatic aberration to provide images that have superior contrast.

### 5-Time Zoom Range

Whether shooting close range shots or reaching out to the furthest distances, the MONARCH 5's phenomenal 5-time zoom range and smooth zoom control makes it an effective riflescope for almost any usage.

### Fully Multicoated Optical System

Nikon has engineered the entire optical system to provide the shooter with a bright, sharp picture and high light transmission.

### Spot On Ballistic Match Technology Optimized

MONARCH 5 riflescopes are compatible with Spot On™ Technology to maximize your long distance accuracy with virtually any cartridge. [NikonSportOptics.com/SpotOn](http://NikonSportOptics.com/SpotOn)

### MONARCH Eye Box Technology

MONARCH 5 scopes feature massive ocular lenses that deliver a huge, exceptionally bright, high-resolution sight picture and constant, non-critical eye relief that can be used on even heavy recoiling rifles.

### Hand turn Reticle Adjustments with Spring-Loaded Instant Zero-Reset Turrets

To simplify field adjustments, Nikon has integrated this feature into all MONARCH 5 Riflescopes. Just sight in as usual, then lift the adjustment knob, rotate to your "zero", and re-engage.

### Enhanced Mount Ring Spacing

Most MONARCH 5 models can be mounted to virtually any rifle action regardless of caliber—even magnum-length actions.

### One-Piece Main Body Tubes

For minimum weight and maximum strength and durability.

### Sunshade Adaptable

Optional accessory sunshade eliminates glare in bright conditions and keeps dust and rain off of the objective lens. A sunshade is included in a standard set for 3-15x50, 4-20x50, 5-25x50 and 6-30x50 models.

### Flip-Open Caps

Included with each riflescope.

### Waterproof, Fogproof, Shockproof

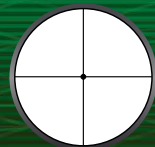

Nitrogen filled and O-ring sealed.

Advanced BDC

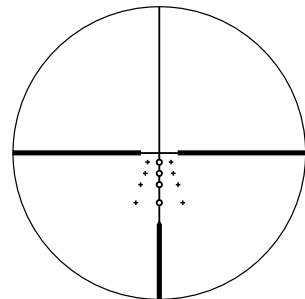

Fine Crosshair w/ Dot

### Advanced BDC Reticle

The new glass-etched Advanced BDC reticle has unique circles going down the vertical sight post that are used as aiming points to compensate for bullet drop at extended ranges. It also has windage marks on both the left and right side of the post that are calibrated for a 10-mile-per-hour cross wind when the rifle is zeroed in at either 100 yards or 200 yards. Even if the cross wind is more or less than 10 mph, shooters now have a reliable benchmark to compensate for distance and windage.

## MONARCH

### The Benchmark of Rifle Scope Performance

The MONARCH flag flies high with the broad lineup of riflescopes that make up the MONARCH 3 series. With a full complement of features and a long list of flagship performance attributes, MONARCH 3 combines impressive optics and reliable mechanical functionality in a package fitting for any fine rifle..

**SPOT-ON™**  
BALLISTIC MATCH I TECHNOLOGY

OPTIMIZED

#### FEATURES

**Spot On Ballistic Match Technology Optimized**  
MONARCH 3 riflescopes are compatible with Spot On™ Technology to maximize your long distance accuracy with virtually any cartridge. [NikonSportOptics.com/SpotOn](http://NikonSportOptics.com/SpotOn)

**Choice of Nikon's Patented BDC Reticle**  
The BDC reticle allows hunters to hold "dead-on" at ranges exceeding those previously thought possible. The BDC's unique see-through ballistic circles offer an incredible advantage for long range shooting—yet allow a normal sight picture for shorter-range shots where the crosshair itself is the aiming point.

**Fully Multicoated Optical System**  
Nikon has engineered the entire optical system to provide the shooter with a bright, sharp, incredibly flat sight picture and light transmission up to 95%.

**MONARCH Eye Box Technology**  
With an impressive 4-time zoom range and four inches of constant, non-critical eye relief, MONARCH 3 scopes feature massive ocular lenses that deliver a huge, exceptionally bright, high-resolution sight picture.

**Hand turn Reticle Adjustments with Spring-Loaded Instant Zero-Reset Turrets**  
To simplify field adjustments, Nikon has integrated this feature into all MONARCH 3 Riflescopes. Just sight in at 100 yards as usual, then lift the adjustment knob, rotate to your "zero", and re-engage.

**Spot On Custom Turret Compatible**  
MONARCH 3 riflescopes can be customized with Nikon Spot On™ custom dials to match bullet

drop for virtually any factory or custom load—allowing crosshair-center aiming for various distances.

**Smooth Zoom Control**  
Magnification reference numbers are viewable from the shooter's position.

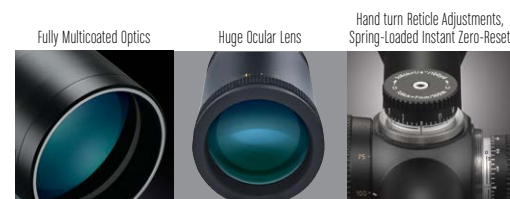

**Enhanced Mount Ring Spacing**  
Most MONARCH 3 models can be mounted to virtually any rifle action regardless of caliber—even magnum-length actions.

**One-Piece Main Body Tubes**  
For minimum weight and maximum strength and durability.

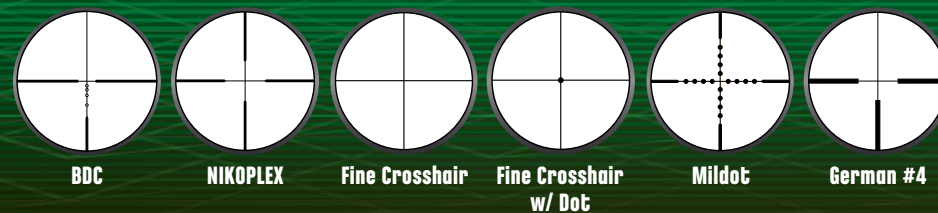

**Sunshade Adaptable**  
Optional accessory sunshade (available for 42mm & larger objectives) eliminates glare in bright conditions and keeps dust and rain off of the objective lens. A sunshade is included in a standard set for 5-20x44, and 6-24x50 models.

**Flip-Open Caps**  
Included with each rifle scope.

**Waterproof, Fogproof, Shockproof**  
Nitrogen filled and O-ring sealed.

# PROSTAFF 7

## Enjoy A New Long Distance Hunting Relationship

The new PROSTAFF 7 riflescope is a dream come true for hunters who've been looking for a high quality, do-it-all scope that they can pair with a rifle and use reliably year after year. Not only does the new PROSTAFF 7 line of riflescopes offer 4x zoom ratio, fully multicoated optics and spring-loaded instant zero-rest turrets, but these new riflescopes are built on 30mm main body tubes. This nets you a broader range of windage and elevation adjustment, along with enhanced diameter interior lenses.

## FEATURES

### Massive Adjustment Range

The PROSTAFF 7's larger body tube allows for much greater windage and elevation travel—an important attribute for extreme long range shooting.

### Hand turn Reticle Adjustments with Spring-Loaded Instant Zero-Reset Turrets

To simplify field adjustments, Nikon has integrated this feature into all PROSTAFF 7 Riflescopes. Just sight in as usual, then lift the adjustment knob, rotate to your "zero", and re-engage.

### Fully Multicoated Optical System

Maximizes light transmission for a bright, high-contrast sight picture.

### Rugged, 30mm Main Body Tube

Engineered for minimum weight and maximum strength and durability, Nikon builds these scopes from aircraft grade aluminum alloy and utilizes larger internal lenses for maximum resolution and superior low-light performance.

### Spot On Ballistic Match Technology Optimized

Compatible with Spot On™ Technology to maximize your long distance accuracy with virtually any cartridge. NikonSportOptics.com/SpotOn.

### Choice of Nikon's Patented BDC Reticle

The BDC reticle allows hunters to hold "dead-on" at ranges exceeding those previously thought possible. The BDC's unique see-through ballistic circles offer an incredible advantage for long range shooting—yet allow a normal sight picture for shorter-range shots where the crosshair itself is the aiming point.

### Spot On Custom Turret Compatible

PROSTAFF 7 riflescopes can be customized with Nikon Spot On™ custom dials to match bullet drop for virtually any factory or custom load—allowing crosshair-center aiming for various distances.

### Smooth Zoom Control

For quick magnification changes.

### Sunshade Adaptable

Optional accessory sunshade eliminates glare in bright conditions and keeps dust and rain off of the objective lens. A sunshade is included in the standard set for 4-16x42 and 4-16x50 models.

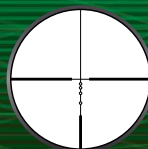

### Waterproof, Fogproof, Shockproof

Nitrogen filled and O-ring sealed.

## PROSTAFF 5

### Advanced Riflescope Performance

The PROSTAFF 5 series features riflescope technology that will satisfy even the most demanding hunters and shooters. A remarkably bright optical system, precise hand-turn reticle adjustments with spring-loaded Instant Zero-Reset turrets, and a convenient quick-focus eyepiece with a 4x zoom ratio, make adjustments while in a shooting position a breeze. PROSTAFF 5 riflescopes are built with fully multicoated optics for maximum light transmission, even in extreme low light environments.

### PROSTAFF 5 - Illuminated Reticle

Riflescopes feature glass-etched illuminated reticles with fully multicoated optics for maximum light transmission, even in extreme low light environments. Each illuminated reticle is selectable between 10 intensity levels of red or green illumination (5 red, 5 green) with a compact rheostat dimmer located on the side focus knob for easy adjustment while in the shooting position.

**SPOT-ON™**  
BALLISTIC MATCH TECHNOLOGY

OPTIMIZED

#### FEATURES

##### Fully Multicoated Optical System

Maximizes light transmission for a bright, high-contrast sight picture.

##### Spot On Ballistic Match Technology Optimized

Compatible with Spot On™ Technology to maximize your long distance accuracy with virtually any cartridge. [NikonSportOptics.com/SpotOn](http://NikonSportOptics.com/SpotOn).

##### Choice of Nikon's Patented BDC Reticle

The BDC reticle allows hunters to hold "dead-on" at ranges exceeding those previously thought possible. The BDC's unique see-through ballistic circles offer an incredible advantage for long range shooting—yet allow a normal sight picture for shorter-range shots where the crosshair itself is the aiming point.

##### Hand turn Reticle Adjustments with Spring-Loaded Instant Zero-Reset Turrets

To simplify field adjustments, Nikon has integrated this feature into all PROSTAFF 5 Riflescopes. Just sight in as usual, then lift the adjustment knob, rotate to your "zero", and re-engage.

##### Spot On Custom Turret Compatible

PROSTAFF 5 riflescopes can be customized with Nikon Spot On™ custom dials to match bullet drop for virtually any factory or custom load—allowing crosshair-center aiming for various distances.

##### Smooth Zoom Control

For quick magnification changes.

##### Sunshade Adaptable

Optional accessory sunshade (available for 40mm & 50mm objectives) eliminates glare in bright conditions and keeps dust and rain off of the objective lens. A sunshade is included in the standard set for 4.5-18x40 model.

##### Waterproof, Fogproof, Shockproof

Nitrogen filled and O-ring sealed.

## PROSTAFF RIMFIRE

### Rimfire Riflescopes

Rimfire calibers are still extremely popular among shooters because they are not only fun to shoot, they can be extremely accurate as well. That's why Nikon has a comprehensive line-up of rimfire riflescopes. The new PROSTAFF RIMFIRE II is the perfect optic for long guns and combines Nikon's Fully Multicoated optical system with the rimfire-specific BDC 150 reticle. Nikon's P-RIMFIRE riflescopes are the ideal option for shooters who use AR-platform rifles, while the PROSTAFF Target EFR is a great choice for either rimfire or air rifle. Each riflescope can be optimized with Nikon's Spot On Ballistic Match Technology to extract the maximum performance out of any rimfire caliber.

**SPOT-ON™**  
BALLISTIC MATCH | TECHNOLOGY

## PROSTAFF Target EFR

3-9x40 AO

## P-RIMFIRE

2-7x32

## PROSTAFF RIMFIRE

3-9x40

### FEATURES

#### BDC 150 Reticle

Designed specifically for rimfire, the BDC 150 reticle allows shooters to compensate for bullet drop at extended shooting distances. The BDC's unique see-through ballistic circles offer an incredible advantage for long range shooting—yet allow a normal sight picture for shorter-range shots where the crosshair itself is the aiming point.

#### Extremely Bright Sight Picture

Allows for high-resolution images even when hunting in the least desirable conditions.

#### Fully Multicoated Optical System

Multiple layers of anti-reflective compounds on every glass surface provide bright and vivid sight pictures and optimum light transmission and maximum brightness from dawn to dusk.

#### Spring-Loaded Zero-Reset Turrets

To simplify field adjustments, Nikon has integrated this feature into all riflescopes. Just sight-in as usual, then lift the spring-loaded adjustment knob, rotate to your "zero", and re-engage. Field adjustments are now as simple as dialing-in your subsequent ranges.

#### Waterproof, Fogproof, Shockproof

Nitrogen filled and O-ring sealed.

### Finish with Nikon's Scope Mounts

Nikon's scope mounting systems are engineered to uphold the precision, strength and good looks designed into every Nikon riflescope. Choose from S-Series steel or A-Series aluminum rings and bases, mounts for AR platforms and specialty rings for camouflage riflescopes and firearms. All are CNC machined from solid bar stock and are held to incredibly tight tolerances.

### RIFLESCOPE RINGS AND BASES

S-SERIES – Steel

Camo Mount Rings

A-SERIES – Aluminum

#### S-Series Steel Mount Rings

The S-Series rings incorporate a square, stainless steel recoil control key in both the front and rear rings. This ensures a "no slip" positive recoil surface across the entire slot of the base that is capable of withstanding extreme recoil. The S-Series rings utilize four (4) T-15 Torx-style socket cap screws per ring for secure optics mounting for increased strength and riflescope alignment. The ring band width is also substantially wider than typical rings, offering more ring-to-scope clamping area to hold the riflescope firmly in place.

- High Quality Steel Construction with Matte Black Finish—camo styles also available
- Fits all S-Series/Weaver/Warne/Picatinny-style Bases
- Choose from Models for 1-inch and 30mm Tube Riflescopes

#### S-Series Steel Mount Bases

The S-Series Base design is one of the strongest and most versatile mounting systems available today. These bases offer a full width recoil slot in each base that mates with the recoil control keys of S-Series rings, resulting in maximum bearing surface to fend-off severe recoil.

- Strong, Solid Steel Construction with Matte Black Finish
- Fits S-Series Steel Rings

#### A-Series Aluminum Mount Rings

Engineered specifically for lighter-weight rifles, the lightweight and economical A-Series rings are designed for an incredible strength-to-weight ratio. The A-Series rings incorporate an integral steel recoil bolt in both the front and rear rings. This ensures a positive recoil surface across the entire slot of the base that is capable of withstanding heavy recoil.

- Strong, Lightweight Aluminum Alloy Construction with Matte Black Finish
- Fits all A-Series/Weaver/Warne/Picatinny-style Bases
- Choose from Models for 1-inch and 30mm Tube Riflescopes

#### A-Series Aluminum Mount Bases

The A-Series Base design is modeled around the popular Weaver design, which is one of the strongest and most versatile mounting systems available today. These bases offer a full width recoil slot in each base that mates with the recoil bolt of A-Series rings, resulting in maximum bearing surface to manage recoil stress on the mount.

- Strong, Lightweight Aluminum Alloy Construction with Matte Black Finish
- Fits A-Series Aluminum Rings

### AR Mounts

Built of strong-yet-lightweight alloy construction, Nikon's AR mounts provide ideal height and fore-aft position for proper eye relief and charging handle access.

M-308 Mount (20 MOA Slope)

M-223 XR Mount

P-SERIES Mount

#### M-308

- Built-in 20 MOA slope
- Lightweight alloy construction
- Fits 1-inch scopes

#### M-Series XR

- Built-in 20 MOA slope
- Extreme long-range M-Series variant
- Available for 1-inch and 30mm scopes

#### M-Series

- Lightweight alloy, one-piece construction
- Developed specifically for the M-223
- Available for 1-inch and 30mm scopes

#### P-Series

- Lightweight alloy construction
- 2-piece reversible design
- Available models for standard and compact 1-inch and 30mm tube AR scopes

# Bolt XR

## Bolt XR Crossbow Scope

Nikon delivers its legendary optical performance, ruggedness and next generation reticle technology to the important crossbow hunting and shooting segment with the BOLT XR. Providing Nikon's trademark brightness and clarity, a huge field-of-view, quick focus eyepiece and its own BDC (Bolt Drop Compensating) reticle, BOLT XR puts long range capability into the hands of the horizontal bowhunter.

### RETICLE

BDC 60

### FEATURES

Are you and your crossbow up to the 60-yard challenge? Nikon believes you are when your bow is wearing the Bolt XR. Designed to do what other crossbow scopes do not, the Bolt XR features bright, fully multicoated 3x Nikon optics, a large ocular that makes full use of its wide field of view, 3.4 inches of eye relief and quick focus eyepiece with  $\pm 4$  diopter adjustment. The BDC 60 reticle offers precise aiming points out to very achievable 60 yards, and when optimized using Spot On, can be custom tuned to match up with virtually any crossbow velocity and bolt weight.

#### Fully multicoated lenses

For maximum brightness and contrast, Nikon coats all lenses with multiple layers of anti-reflective compounds.

#### Precise 1/4-inch@ 20 yds. Instant Zero-Reset Turrets

Instant Zero-Reset turrets allow you to sight-in at 20 yards, then lift the adjustment knob, rotate to your "zero", and re-engage. Field adjustments are now as simple as dialing-in your subsequent ranges.

#### Lightweight Design

Fits virtually every crossbow design.

#### Quick Focus Eyepiece

$\pm 4$  Diopter.

#### Parallax-Free @ 20 yards

For optimum accuracy.

#### Waterproof, Fogproof

Huge Ocular Lens on Eye Box

# Arrow ID 5000

## ARROW ID 5000 Bowhunting Laser Rangefinder

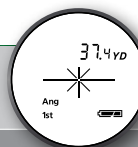

Designed exclusively for bowhunting, the Nikon ARROW ID 5000 is truly the ultimate bowhunter's rangefinder for real world bowhunting situations. This rangefinder features Nikon's legendary multicoated optics, waterproof/fogproof ruggedness, pocket-sized portability, long eye relief, Tru-Target Priority System, and Nikon's ID (Incline/Decline) Technology.

### FEATURES

#### ID (Incline/Decline) Technology

Nikon's advanced ID (Incline/Decline) Technology provides the horizontal distance to the target, even when ranging at various incline or decline shooting angles—up to an incredible  $\pm 89$  degrees (nearly vertical up or down). This technology is extremely useful to bowhunters, who often hunt out of elevated tree stands. Rangefinders with ID Technology are also a great tool for crossbow hunters who use Nikon's Spot On Ballistic Technology because they provide the exact range needed to determine the correct aiming point needed to compensate for bolt/arrow drop at extended ranges.

**id**  
TECHNOLOGY

Nikon ID (Incline/Decline) Technology calculates the horizontal distance of even the most severe uphill or downhill shooting angles—providing the one number you need to make the shot.

#### Tru-Target Technology

Tru-Target Technology enables users to choose between two different ranging modes depending on the situation.

First Target Priority Mode provides the exact distance to the closest object among a group of targets being measured. In this mode, you can easily range an object as small as a fence post. Distant Target Priority Mode displays the range of the farthest target among a group of targets measured. This feature is especially useful if the subject is located behind tall grass or brush. The best part is that changing between modes is as easy as holding down both buttons for 2 seconds.

Thanks to Nikon's original data-processing algorithm HYPER READ, the measured distance is displayed with a fast, stable response regardless of how far you are from the target.

#### Easy-to-view Uncluttered LCD Display

Enables easy ranging, even in bright sunlight, displays distances in 1/10th-of-a-yard increments.

#### Simple, Single Number Display (Reticle)

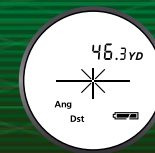

Provides the number needed to take the shot.

#### ADDITIONAL FEATURES:

- 1/2-yard accuracy
- Quick and simple one-hand operation
- Select from two measurement modes (Tru-Target Priority System)
- Long eye relief
- Continuous measurement (up to 8 seconds)
- Single button measurements
- Ultra-compact and lightweight
- Includes silent technology case in Realtree APG Camo

\* See technology statement on page 65.

## MONARCH 7

A two-time winner of the Outdoor Life Great Buy Award (for both the 42mm and 30mm versions), the MONARCH 7 has quickly earned a reputation as the ultimate hunting binocular. The hallmark of the MONARCH 7 is its optical system—a seamless carrier of light that utilizes Nikon's premium ED (Extra-low Dispersion) glass and proprietary lens and prism coatings. This heart of the MONARCH 7 not only pushes resolution and brightness to extreme levels, but also further enhances your viewing experience with an amazingly wide field of view, close-focus capability and comfortable eye relief.

**ED  
GLASS**

Both 42mm and 30mm binocular models have received the award.

### FEATURES

#### Superior Optical System

The MONARCH 7 binocular features Nikon's legendary ED (Extra-low Dispersion) glass lenses that effectively compensate for chromatic aberrations to provide images of superior contrast and outstanding resolution.

#### Wide Apparent of View

With a wide field of view, the MONARCH 7 binocular makes it easy to find your subject.

#### Dielectric High-Reflective Multilayer Prism Coatings

Applied to a mirror surface of the roof prism unit, this technique provides clear high-contrast images that display accurate color reproduction.

#### Phase-Correction Coated Roof Prisms

MONARCH 7 binoculars provide high-resolution images with extremely accurate color reproduction, thanks to phase-correction coated prisms.

#### Turn-and-Slide Rubber Eyecups

The turn-and-slide rubber eyecups allow users to adjust the eye relief for a custom fit—providing a full field of view and maximum comfort during extended periods of use.

#### Anti-Scratch Coating

Scratch-resistant coating for outside objective and eyepiece lenses (42mm models).

#### Fully Multicoated Eco-Glass Lenses

Multilayer coatings, which provide an even higher light transmittance across the entire visible light spectrum, are applied to all of the lens and prism surfaces that transmit light. This minimizes the loss of light due to reflection, thereby ensuring a more natural, clearer view.

#### Smooth Central Focus Knob

With this simple and intuitive design, bringing objects into focus has never been easier.

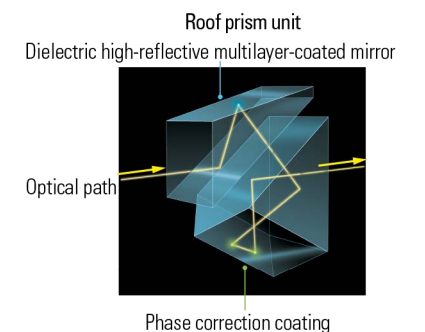

#### Waterproof

MONARCH 7 binoculars are Nitrogen filled and O-Ring sealed for complete waterproof and fogproof performance.

#### ADDITIONAL FEATURES:

- Multi-setting click stop eyecups
- Flip-Down Objective Lens Covers
- Lightweight, Slim Design

- 23 ounces with a balanced, ergonomic feel (10x42)
- Quick focusing from 6.6 feet to infinity (30mm models)
- Sure-grip rubber outer armor

## MONARCH 5

The proven choice for hunters who require all-conditions optical performance, the MONARCH 5 further elevates its game with improved agility and advanced low light brilliance. With the addition of Nikon's ED glass lenses, the MONARCH 5 binocular is in a class of its own for battling darkness with sharp, high-contrast views. It's the lightest member of the MONARCH 42mm family and is also available with 56mm objective lenses for extreme light gathering ability.

**ED**  
GLASS

### FEATURES

#### Featuring Nikon's ED Glass Lenses—The Difference Is Clear

All MONARCH 5 binoculars are now built with Nikon's legendary ED (Extra-low Dispersion) glass lenses, which correct chromatic aberrations and effectively compensate for color fringing. Even when observing objects that would make chromatic aberration the most apparent – such as adjacent whites and blacks – the images will maintain superior contrast and resolution thanks to the ED glass lenses. The improved resolution also provides brighter, more natural looking images, making the MONARCH 5 a serious contender to be your "go-to" binocular for years to come.

#### Enjoy Comfortable Viewing—Nikon's High-Eyepoint Design

Nikon has manufactured the MONARCH 5 binoculars, as well as many other of its optics, with a high-eyepoint design. This provides a clear field of view for everyone, even when the user is wearing eyeglasses, with sufficient space between the user's eye and the eyepiece lenses.

#### Greater Light Transmission—Fully Multicoated Eco-Glass Lenses

Multilayer coatings, which provide an even higher light transmittance across the entire visible light spectrum, are applied to all of the lens and prism surfaces that transmit light. This minimizes the loss of light due to reflection, thereby ensuring a more natural, clearer view.

#### Rich, Accurate Colors—Dielectric High-Reflective Multilayer Prism Coating

This technique boosts light reflectivity for the full visible range, which provides clearer whites and a sharper, brighter, and more natural vision across the entire field of view.

#### Turn-and-Slide Rubber Eyecups

The turn-and-slide rubber eyecups allow users to adjust the eye-relief for a custom fit - providing a full field of view and maximum comfort during extended periods of use.

#### Durable Rubber-Armored Body

Built to handle any environment, the MONARCH 5 has a rubber-armored coating to withstand extreme use and provide a non-slip grip, even in the wettest conditions.

#### Smooth Central Focus Knob

This intuitive design allows fast, detailed focus on subjects close-in or at a distance.

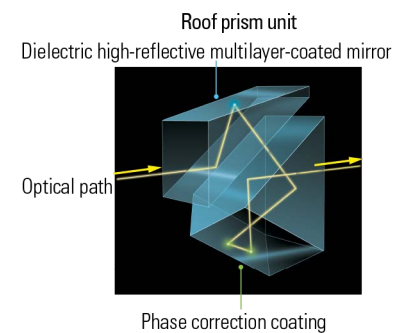

#### Waterproof and Fogproof

MONARCH 5 binoculars are Nitrogen filled and O-Ring sealed for complete waterproof and fogproof performance.

#### ADDITIONAL FEATURES:

- Multi-setting click stop eyecups
- Phase-correction coated prisms

- Flip-Down Objective Lens Covers
- Tripod adapter included with 16x56 and 20x56 models
- Quick central focusing

## MONARCH 3

With its legendary MONARCH bloodlines and enhanced optical system – the MONARCH 3 can maximize every hour spent in the field – with fully multicoated Eco-Glass lenses and phase-correction high reflective silver-alloy prism coatings that provide incredibly bright, high-resolution views from the first rays of light until the very last. Designed for a lifetime of tough use with multi-click, turn-and-slide rubber eyecups, long eye relief and a lightweight and rugged, yet sleek and comfortable ATB body.

10x42 Xtra Green

### FEATURES

#### Fully Multicoated Eco-Glass Lenses

The sophisticated coating Nikon applies to MONARCH 3 binoculars goes far beyond conventional ones. Multilayer coatings, which provide an even, higher light transmittance across the entire visible light spectrum, are applied to all of the lens and prism surfaces that transmit light. This minimizes the loss of light due to reflection, thereby ensuring a more natural, clearer view. The technique has been perfected by Nikon and provides almost the same brightness through the binoculars' prisms as that perceived by the naked eye.

#### Long Eye Relief Keeps Everything in Sight

Nikon has manufactured the MONARCH 3 binoculars, as well as many other of their optics, with a high-eyepoint design. This provides a clear field of view for everyone even with sufficient space between the user's face and the binoculars' eyecups. This provides a full field of view through the binoculars even when the user is wearing eyeglasses.

#### Phase-Correction High Reflective Silver-Alloy Prism Coating

MONARCH 3 binoculars deliver, high-contrast images that display accurate color reproduction.

#### Lightweight Slim Design

MONARCH 3 binoculars provide excellent ergonomics, strength, and ruggedness in a package that is comfortable to carry and use all day long.

#### Roof Prism System

Engineered with impeccable precision to assure image reproduction is essentially the same as when viewed with the naked eye.

#### Durable Rubber-Armored Coating

MONARCH 3 binoculars are built to handle any environment. No matter what the weather conditions may be, you will always have a sure, non-slip grip on your binoculars, making them one piece of equipment you can always count on to perform.

#### Smooth Central Focus Knob

Easily bring things into focus with this comfortable and ergonomic design.

#### Lightweight Slim Design

Allows a custom fit to your eye so there won't be any irritation after long periods of use in the field.

#### Waterproof/Fogproof

Nitrogen filled and O-ring sealed for confidence under any conditions.

#### ADDITIONAL FEATURES:

- Multi-setting click stop eyecups
- Turn and slide eyecups
- Flip-Down Objective Lens Covers
- Quick central focusing
- Sure-grip

## PROSTAFF 7s

Nikon's PROSTAFF 7S is a lightweight, easy-to-hold, all-terrain binocular that features an advanced optical system designed to deliver sharper images. It is available in 8x42, 10x42, 8x30 and 10x30 models. Thanks to multilayer-coated Eco-glass lenses and Phase-Correction Coated Roof Prisms, every model in the PROSTAFF 7S series provides the quality, brightness and resolution that make it the perfect companion for your next hunt.

### FEATURES

#### Nikon's Advanced Optical System

PROSTAFF 7S binoculars provide high-resolution images with extremely accurate color reproduction, thanks to Phase-Correction Coated Roof Prisms. Multilayer coatings, which provide an even higher light transmittance across the entire visible light spectrum, are applied to all of the lens and prism surfaces that transmit light. This minimizes the loss of light due to reflection, thereby ensuring a more natural, clearer view.

#### Comfortable Design

A lightweight, ergonomic body design makes the PROSTAFF 7S enjoyable to hold for long periods of time. The central focus knob is intuitive to operate and is very user friendly.

#### Rubber Armored Body

Built to handle any environment, the PROSTAFF 7S has a rubber-armored coating to withstand extreme use and provide a non-slip grip, even in the wettest conditions.

#### Turn-and-Slide Rubber Eyecups

Turn-and-slide rubber eyecups allow users to adjust the eye relief for a custom fit—providing a full field of view and maximum comfort during extended periods of use.

#### Waterproof and Fogproof

PROSTAFF 7S binoculars are Nitrogen filled and O-Ring sealed for complete waterproof and fogproof performance.

## PROSTAFF 5

The workhorse of Nikon's optics, the PROSTAFF 5 binocular is dependable, ergonomic and trustworthy. With four different models to choose from, hunters can select the magnification and objective lens that makes the most sense for where they're hunting.

### FEATURES

#### Multilayer-coated lenses for brighter images

Multilayer coatings, which provide higher light transmittance across the entire visible light spectrum, are applied to the lens and prism surfaces that transmit light. This minimizes the loss of light due to reflection, thereby ensuring a more natural, clearer view.

#### Lightweight and Durable Body

Thanks to a fiberglass-reinforced polycarbonate resin, the PROSTAFF 5 is light enough to take anywhere and strong enough to be trusted on even the more extreme adventures.

#### Enjoy Comfortable Viewing

Nikon has manufactured the PROSTAFF 5 binoculars, as well as many other of its optics, with a high-

eyepoint design. This provides a clear field of view for everyone, even when the user is wearing eyeglasses, with sufficient space between the user's eye and the eyepiece lens.

#### Turn-and-Slide Multi-Click Rubber Eyecups

The turn-and-slide multi-click rubber eyecups allow users to adjust the eye relief for a custom fit—providing a full field of view and maximum comfort during extended periods of use.

#### Smooth Central Focus Knob

This intuitive design allows fast, detailed focus on subjects close-in or at a distance.

#### Waterproof and Fogproof

PROSTAFF 5 binoculars are Nitrogen filled and O-Ring sealed for complete waterproof and fogproof performance.

#### ADDITIONAL FEATURES:

- Long eye relief
- Rubber armoring for shock resistance

ACULON A211

ACULON A30

ACULON T01

# ACULON

## Take Performance With You

The ACULON Series binoculars are great for a variety of hunting applications, thanks to the wide range of magnifications and sizes that are available. ACULON binoculars are a quality, cost-effective choice and a great fit for almost any occasion.

ACULON A211 binoculars deliver a high quality image under a multitude of lighting conditions, making these binoculars effective during those ever-important low-light hours of hunting near dawn and dusk. All together, the ACULON A211 binoculars are a quality, cost effective choice.

The ACULON A30 is a compact, lightweight roof prism binocular that is perfect for the hunt where you need to pack it light. It is available in 10x25 magnification and comes in black or Realtree Xtra® Green.

ACULON T01 Binoculars combine Nikon's quality optics with a sleek new look. Best of all, they are extremely compact and lightweight, making them easy to take anywhere.

The ACULON T11 ZOOM binocular is a portable, pocket-sized option that stows so easily, you won't even know it's there until you need it. With the option of changing magnification anywhere between 8-power and 24-power through a centrally located zoom lever, this binocular will prove to be extremely versatile in many different circumstances.

ACULON T51 binoculars shatter all preconceptions of how a quality binocular is supposed to look and feel. Its sleek design and sturdy aluminum body make the ACULON T51 a stylish carry-along binocular for any occasion.

The ACULON W10 is Nikon's waterproof ACULON offering. Compact, lightweight, ergonomic, with multilayer-coated lenses. Available with 8x or 10x magnification. Now, you're ready for the elements when you need to pack light.

### Action Extreme Binoculars

The Action Extreme is a Porro prism with all the waterproof and fogproof attributes of Nikon's All Terrain Binocular. Nikon's exclusive Eco-Glass lenses and prism systems result in a high quality glass that is also lighter in weight.

- Rugged Waterproof, Fogproof Construction
- Bright, Multicoated Optics
- Long Eye Relief for Eyeglass Wearers
- Rubber Armored
- Multi-Click Turn-and-Slide Eyecups
- BaK4 High Index Prisms

Action Extreme 7x35

### Marine Binoculars

Nikon's StabilEyes fill the gap when weather and wind make your regular binoculars or Fieldscope blurry or hard to use. High winds and shivering conditions can make viewing all but impossible unless you're equipped with StabilEyes.

Marine environments place entirely different demands on optics: the ever-present moisture, the ever-present motion, and the ever-present need for your optics to perform anytime and every time. Nikon's OceanPro Binoculars are engineered specifically to cope with those demands and perform with excellence in time of need.

StabilEyes 14x40

#### StabilEyes

- Exclusive Dual Mode – Onboard/Land (14x40)
- Eliminates movement from waves and vibration from hand shake, etc.
- Exclusive Pan and Tilt Feature
- Waterproof/Fogproof

OceanPro w/ Compass 7x50

#### OceanPro

- Quick, Easy Central Focus
- Rubber Armored, Shockproof Polycarbonate Body
- Long Eye Relief
- Waterproof/Fogproof
- Nylon Floating Strap included
- BaK4 High Index Prisms
- Multicoated Lenses

## A NEW CLASS OF OPTICS FOR A NEW CLASS OF HUNTER

EDG technology has officially changed how the world's greatest hunters earn their stripes. Incredibly bright, sharp, high-resolution images leave nothing to chance as Nikon's superior optics capture every detail with edge-to-edge clarity and natural color correction. In the vast world of extraordinary Nikon sport optics, nothing reveals more clearly than Nikon EDG.

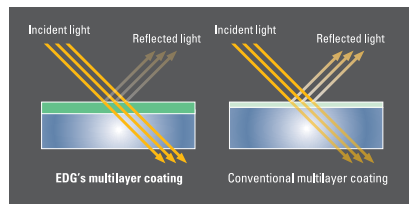

EDG Fieldscopes offer the exclusive ED (Extra-Low Dispersion) glass lenses and dielectric coated prisms\* that deliver extraordinarily high contrast images. The EDG VR also features Nikon's Vibration Reduction System that reduces vibrations caused by the wind or other environmental conditions by up to 88% during observation.

\*Straight Body Only

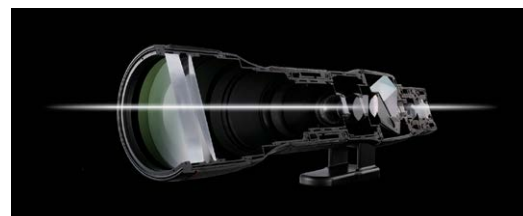

### Advanced Multilayer Coating Delivers Clearer Views

The sophisticated coating Nikon applies to EDG Fieldscopes goes far beyond conventional ones. Multilayer coatings, which provide an even, high light transmittance across the entire visible light spectrum, are applied to all of the lens and prism surfaces that transmit light. This minimizes the loss of light due to reflection, thereby ensuring a more natural, clearer view.

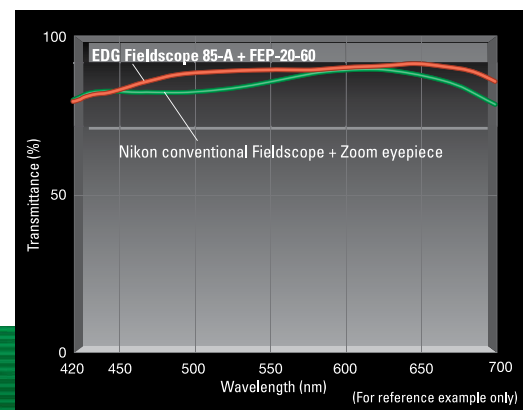

### Dielectric High-Reflective Multilayer Prism Coating

This technique boosts light reflectivity for the full visible range, which provides clearer whites and a sharper, brighter, and more natural vision across the entire field of view.

### Cutting-edge Optical Technologies Ensure a Higher Light Transmission Rate with Exceptional Characteristics

A wealth of advanced technologies are integrated into each and every optical part of the EDG line. This cutting-edge technology results in a higher light transmission rate and flatter characteristics across the entire visible light range. This means you'll experience a crystal clear field of view and more natural color reproduction.

## EDG Fieldscope 85mm

The pro-level EDG 85mm provides the ultimate in optical performance, thanks to ED lenses, advanced apochromat, dielectric high-reflective multilayer prism coating\* and massive 85mm objective lenses. A well-balanced structure achieved with CAE design and an optimized focusing system allows you to take this Fieldscope on the most demanding hunts in the world.

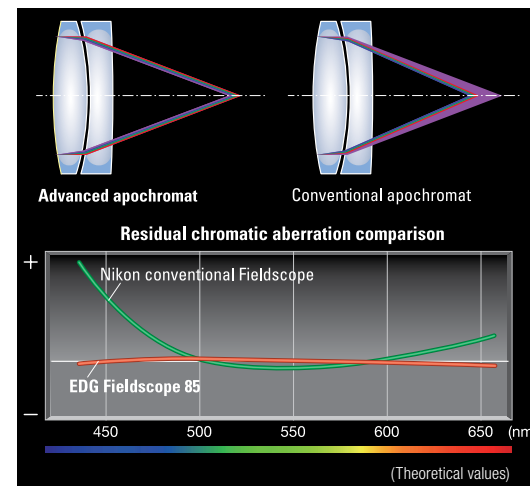

## EDG Fieldscope 65mm

Supreme ruggedness and a larger 65mm objective make this Fieldscope the perfect choice when you're counting every ounce in your pack, yet still need to see every detail on the hunt you've been planning for years. The EDG 65mm won't disappoint, delivering extraordinarily bright, high-resolution views and truly remarkable low-light performance with Nikon's optimized focusing system for fast subject acquisition.

\*Dielectric coatings are only necessary on straight body roof prism models. Not applicable on angled body models.

### Nikon's Superior Chromatic-Aberration Compensation System: "Advanced Apochromat" with ED glass lenses

EDG Fieldscopes bring together Nikon's most sophisticated lens technologies with a precision optical design that gives you a sharper, more brilliant view. For the EDG Fieldscope, our apochromat optical system, which uses ED (Extra-low Dispersion) glass, corrects violet chromatic aberration in addition to the conventional chromatic aberrations of red, blue and green. Because chromatic aberrations are corrected to the furthest limits of the visible light range, and color fringing is effectively compensated, whites are clearer and sharper.

## EDG VR Fieldscope 85mm

Combining Nikon's sophisticated optical technologies with extreme VR (Vibration Reduction) precision has resulted in an optical masterpiece that keeps your viewing world still so you can enjoy the minutest details. With Nikon's superior chromatic-aberration compensation system of ED glass elements with advanced apochromat, field-flattener lens system, advanced multilayer lens and prism coatings and Nikon's original VR system, the EDG VR 85 is truly a one of a kind Fieldscope for optics connoisseurs and photographers looking for maximum focal length.

## Fieldscope 50mm ED

The Fieldscope 50mm ED is incredibly compact and lightweight, perfect for tucking into your pack for all your hunting adventures. Nikon ED glass delivers extremely bright, sharp true color images.

## PROSTAFF Fieldscopes

Nikon PROSTAFF series Fieldscopes offer hunters a wide field of view and superb viewing in all conditions. PROSTAFF Fieldscopes are engineered for precision and high magnification capability. They are built with Nikon's multilayer-coated lenses and prisms for superb brightness.

The PROSTAFF line is also extremely versatile, with options that cover almost any situation. The PROSTAFF 3 Fieldscope Outfit is an extremely lightweight and portable option that comes standard with a tripod and carrying case. For those longer-range situations when larger magnifications are needed, the PROSTAFF 5 offers 20-60x82mm models that assure you don't miss out on the action.

PROSTAFF 5 60mm Straight Body

## PROSTAFF 5

### PROSTAFF 5 20-60x82mm

The PROSTAFF 5 82mm spotting scope features a large objective lens for the brightest field of view, 20-60x zoom eyepiece, as well as straight or angled body versions and waterproof, fogproof construction. PROSTAFF 5 Outfits include straight body, Vue-thru case, zoom eyepiece and full-size tripod.

### PROSTAFF 5 16-48x60mm

Compact, lightweight and tough, the PROSTAFF 5 Waterproof 60mm makes life easier on hunters going deep into the woods. Equipped with a sliding sunshade the waterproof/fogproof scope is available in straight or angled body versions. PROSTAFF 5 Outfits include straight body, Vue-thru case, zoom eyepiece and full-size tripod.

PROSTAFF 5 82mm  
Angled Body

PROSTAFF 3 Outfit

## PROSTAFF 3

### PROSTAFF 3 Fieldscope Outfit

With advanced Next Generation optics backed by nearly 100 years of lens-making experience, the PROSTAFF 3 Fieldscope uses Nikon's legendary fully multicoated optics to provide high-resolution views in almost all lighting conditions. The waterproof/fogproof construction, combined with its compact and lightweight body, makes this Fieldscope extremely mobile. Included with the PROSTAFF 3 Fieldscope is a compact tripod and carry case for ultimate versatility. Nikon tripods have flip leg locks designed to make set-up and take-down surprisingly easy, while the stable design still provides smooth, comfortable viewing.

### PROSTAFF 5 & PROSTAFF 3 FEATURES

#### Bright, Fully Multicoated Optics

Feature lead- and arsenic-free Eco-Glass for high-resolution images and increased light transmission. PROSTAFF 5 and PROSTAFF 3 feature fully multicoated lenses.

#### Super-Fast Bayonet Eyepiece

(ProStaff 5 Models) Perfect to scout wide areas with ease.

#### Zoom Eyepieces

With power zoom ranges, you'll have a wide field of view at the lower powers, plus the capability to move in close for amazing detail at higher powers.

#### Lightweight, Ergonomic Designs

Easy-to-pack and easy-to-use.

#### Waterproof, Fogproof

Nitrogen filled and O-ring sealed.

Electromagnetic Compatibility	FCC Part15 SubPartB class B, EU:EMC directive, AS/NZS, VCCI classB, CU TR 020				
Environment	RoHS, WEEE	RoHS, WEEE	RoHS, WEEE	RoHS, WEEE	RoHS, WEEE

The technology behind the Laser Rangefinder with inclinometer originated from technology incorporated in Nikon's Total Station DTM-1 surveying instrument. The Total Station DTM-1, first sold in 1985, was the first highly advanced electronic model of those surveying instruments that incorporated a distance and angle measuring capability developed by Nikon Corporation.

\*The results from the product may not be achieved depending on the target object's shape, surface texture and nature, and/or weather conditions.

\*\*\*First number is 9999,9yd, second number is 81,000Yd. \*\*\*\*Under Nikon's measurement conditions \*\*\*\*\* Team REALTREE MONARCH GOLD Laser(200 model finished in Realtree Hardwoods Green HD
