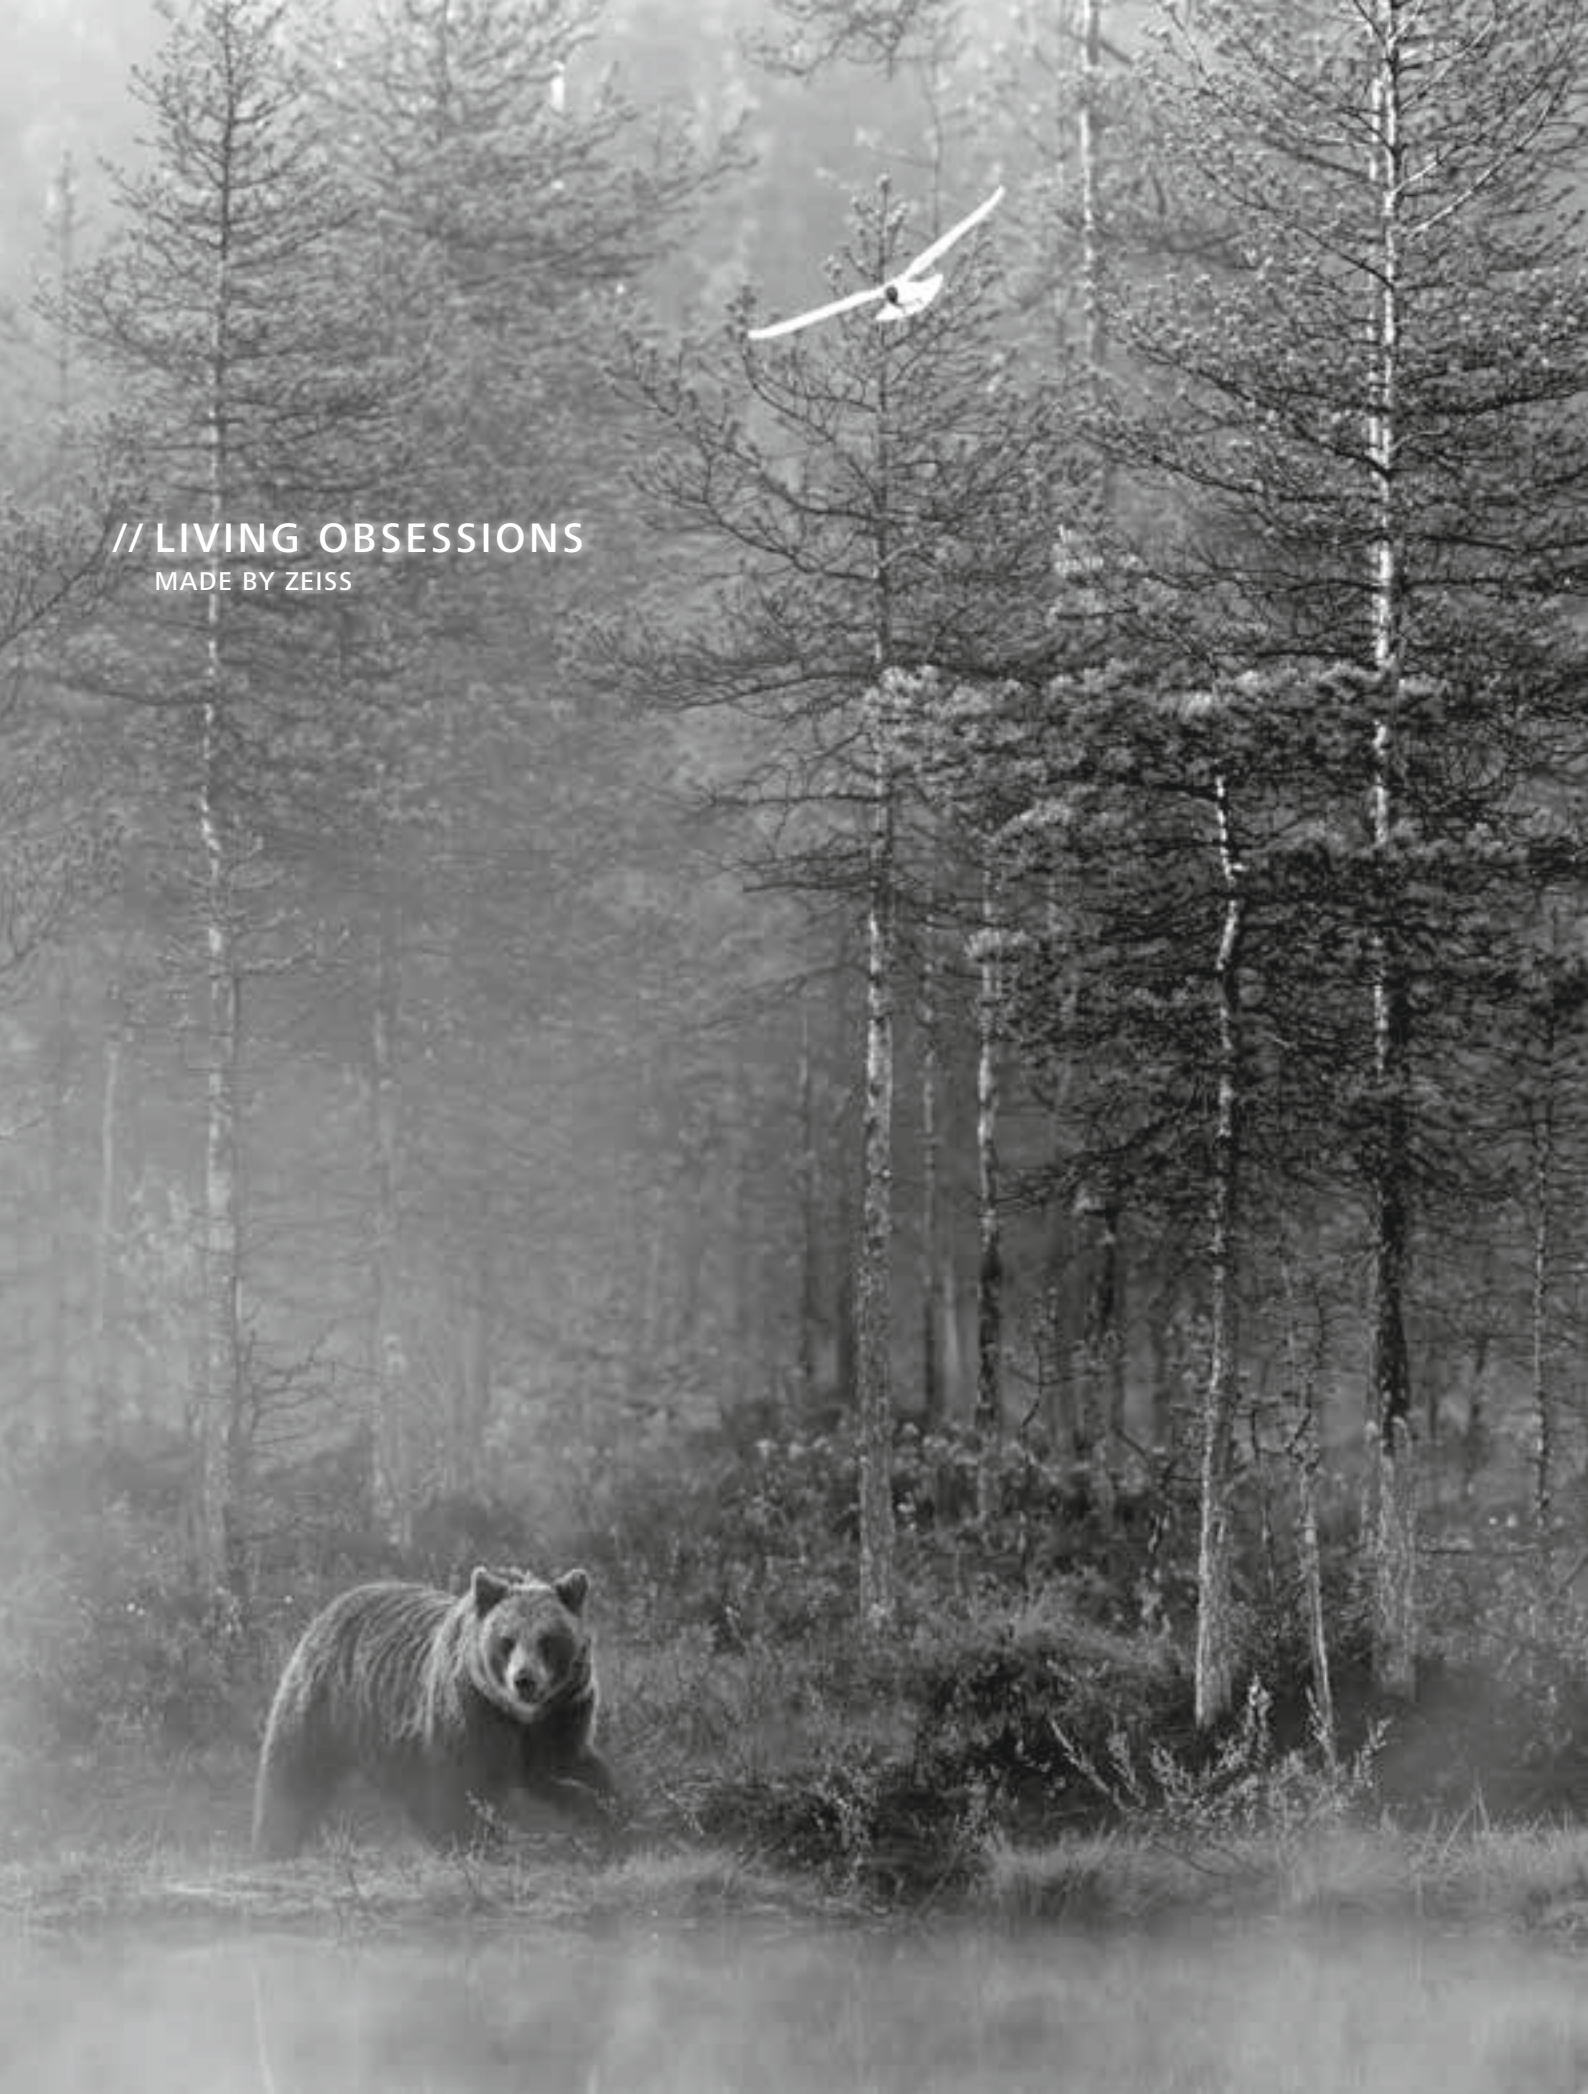
VICTORY® SF

The most versatile premium binoculars from ZEISS

ZEISS

We make it visible.



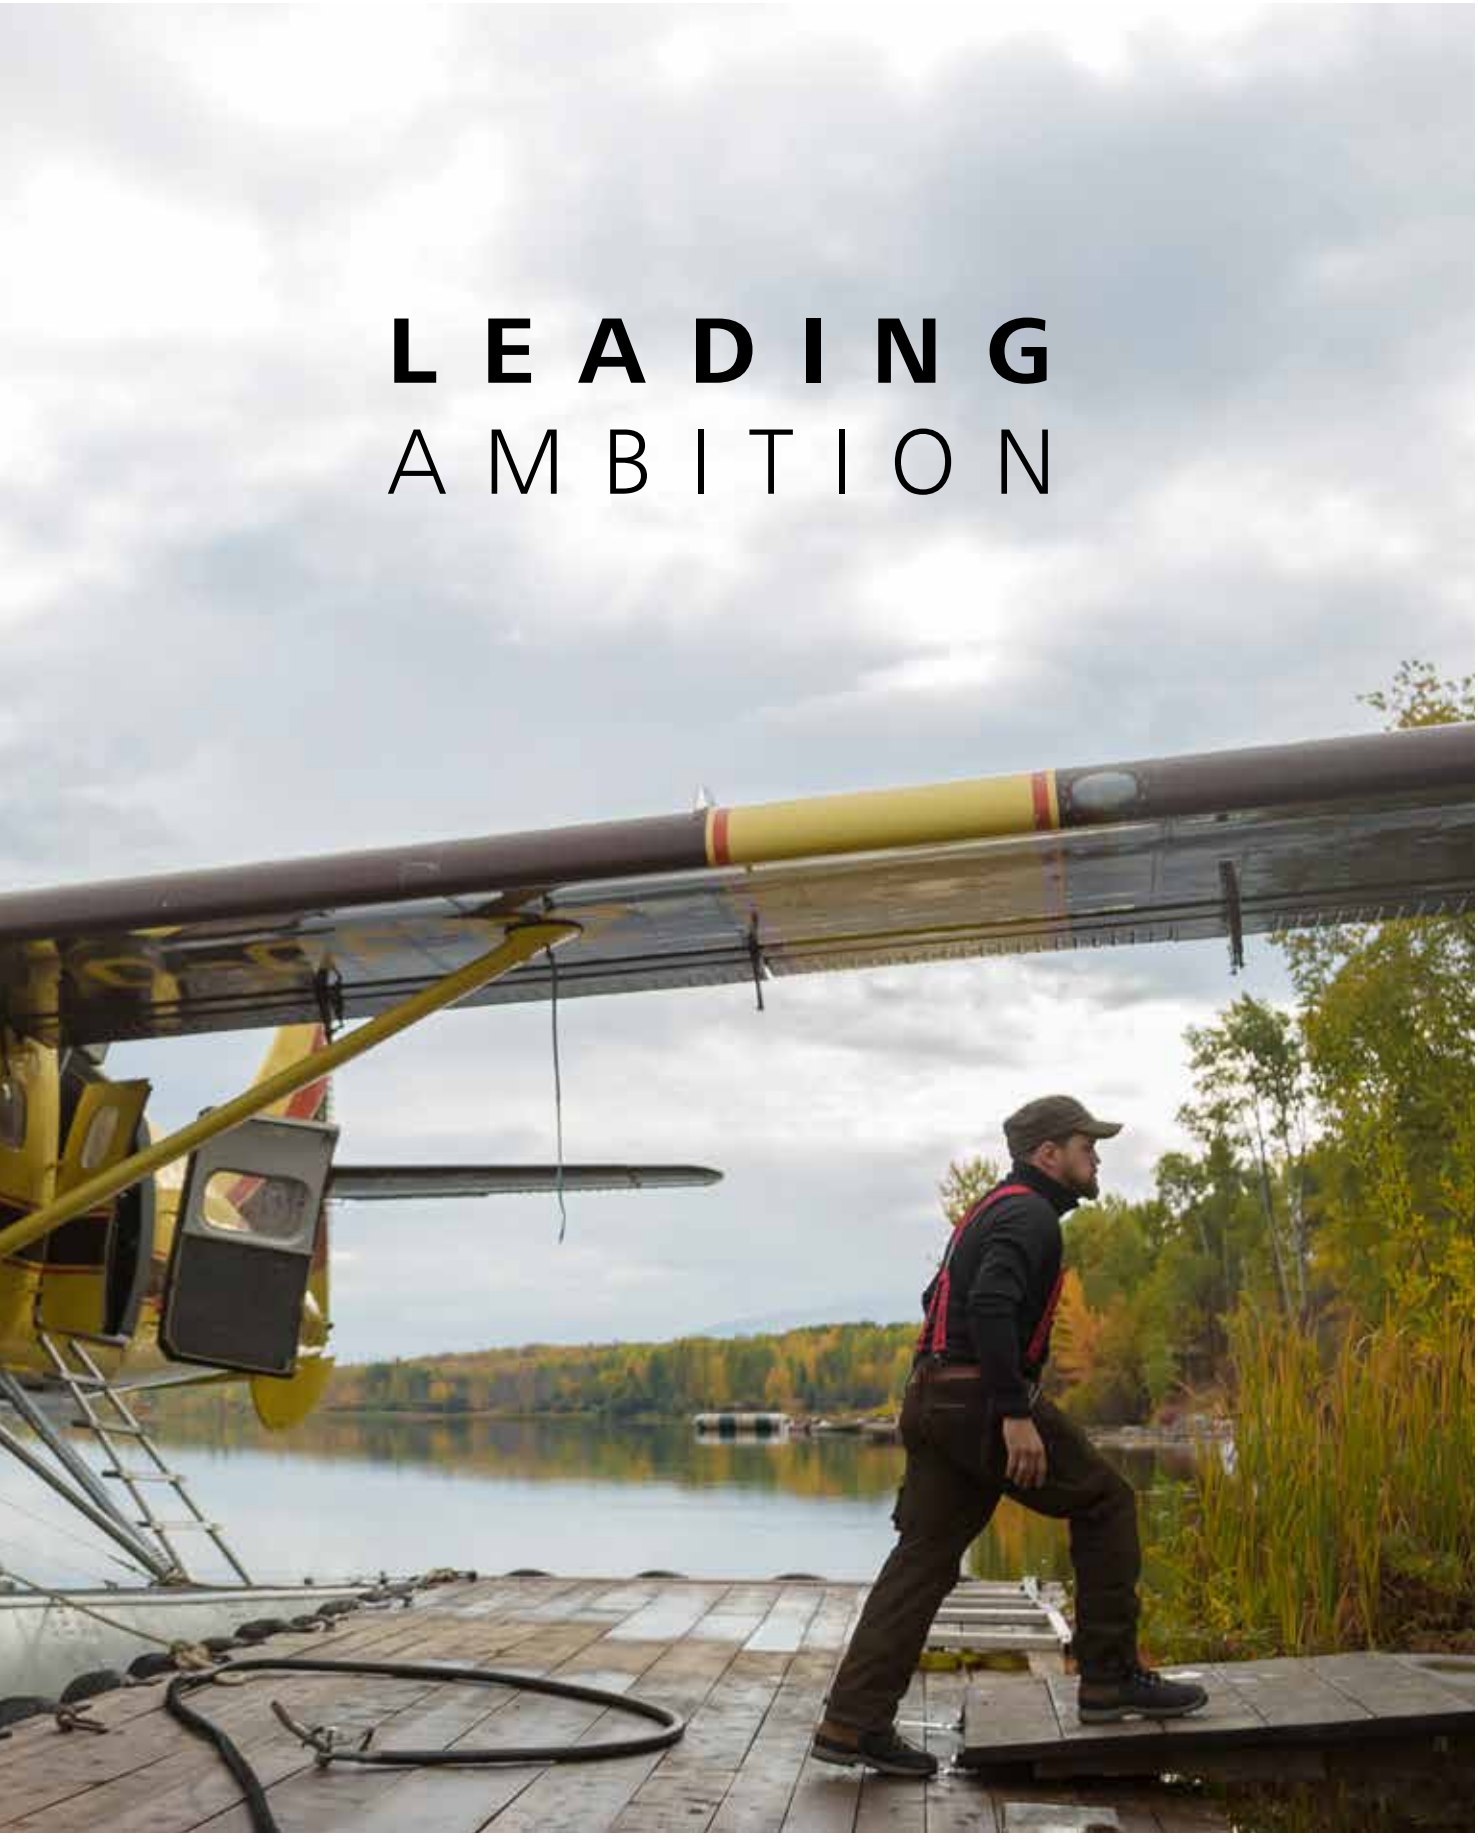
// LIVING OBSESSIONS
MADE BY ZEISS

The moment nothing is more important than the hunt.
This is the moment we work for.

Our most versatile premium binoculars.

The new VICTORY® SF from ZEISS allows you to experience the most exciting hunting moments as never before. The optical perfection, the unparalleled field of view, the revolutionary ergonomics and the ultra-light design make this model the best all-purpose binoculars ever built by ZEISS. Experience the ZEISS VICTORY SF as the most versatile premium binoculars in the company's 165-year history.

LEADING AMBITION



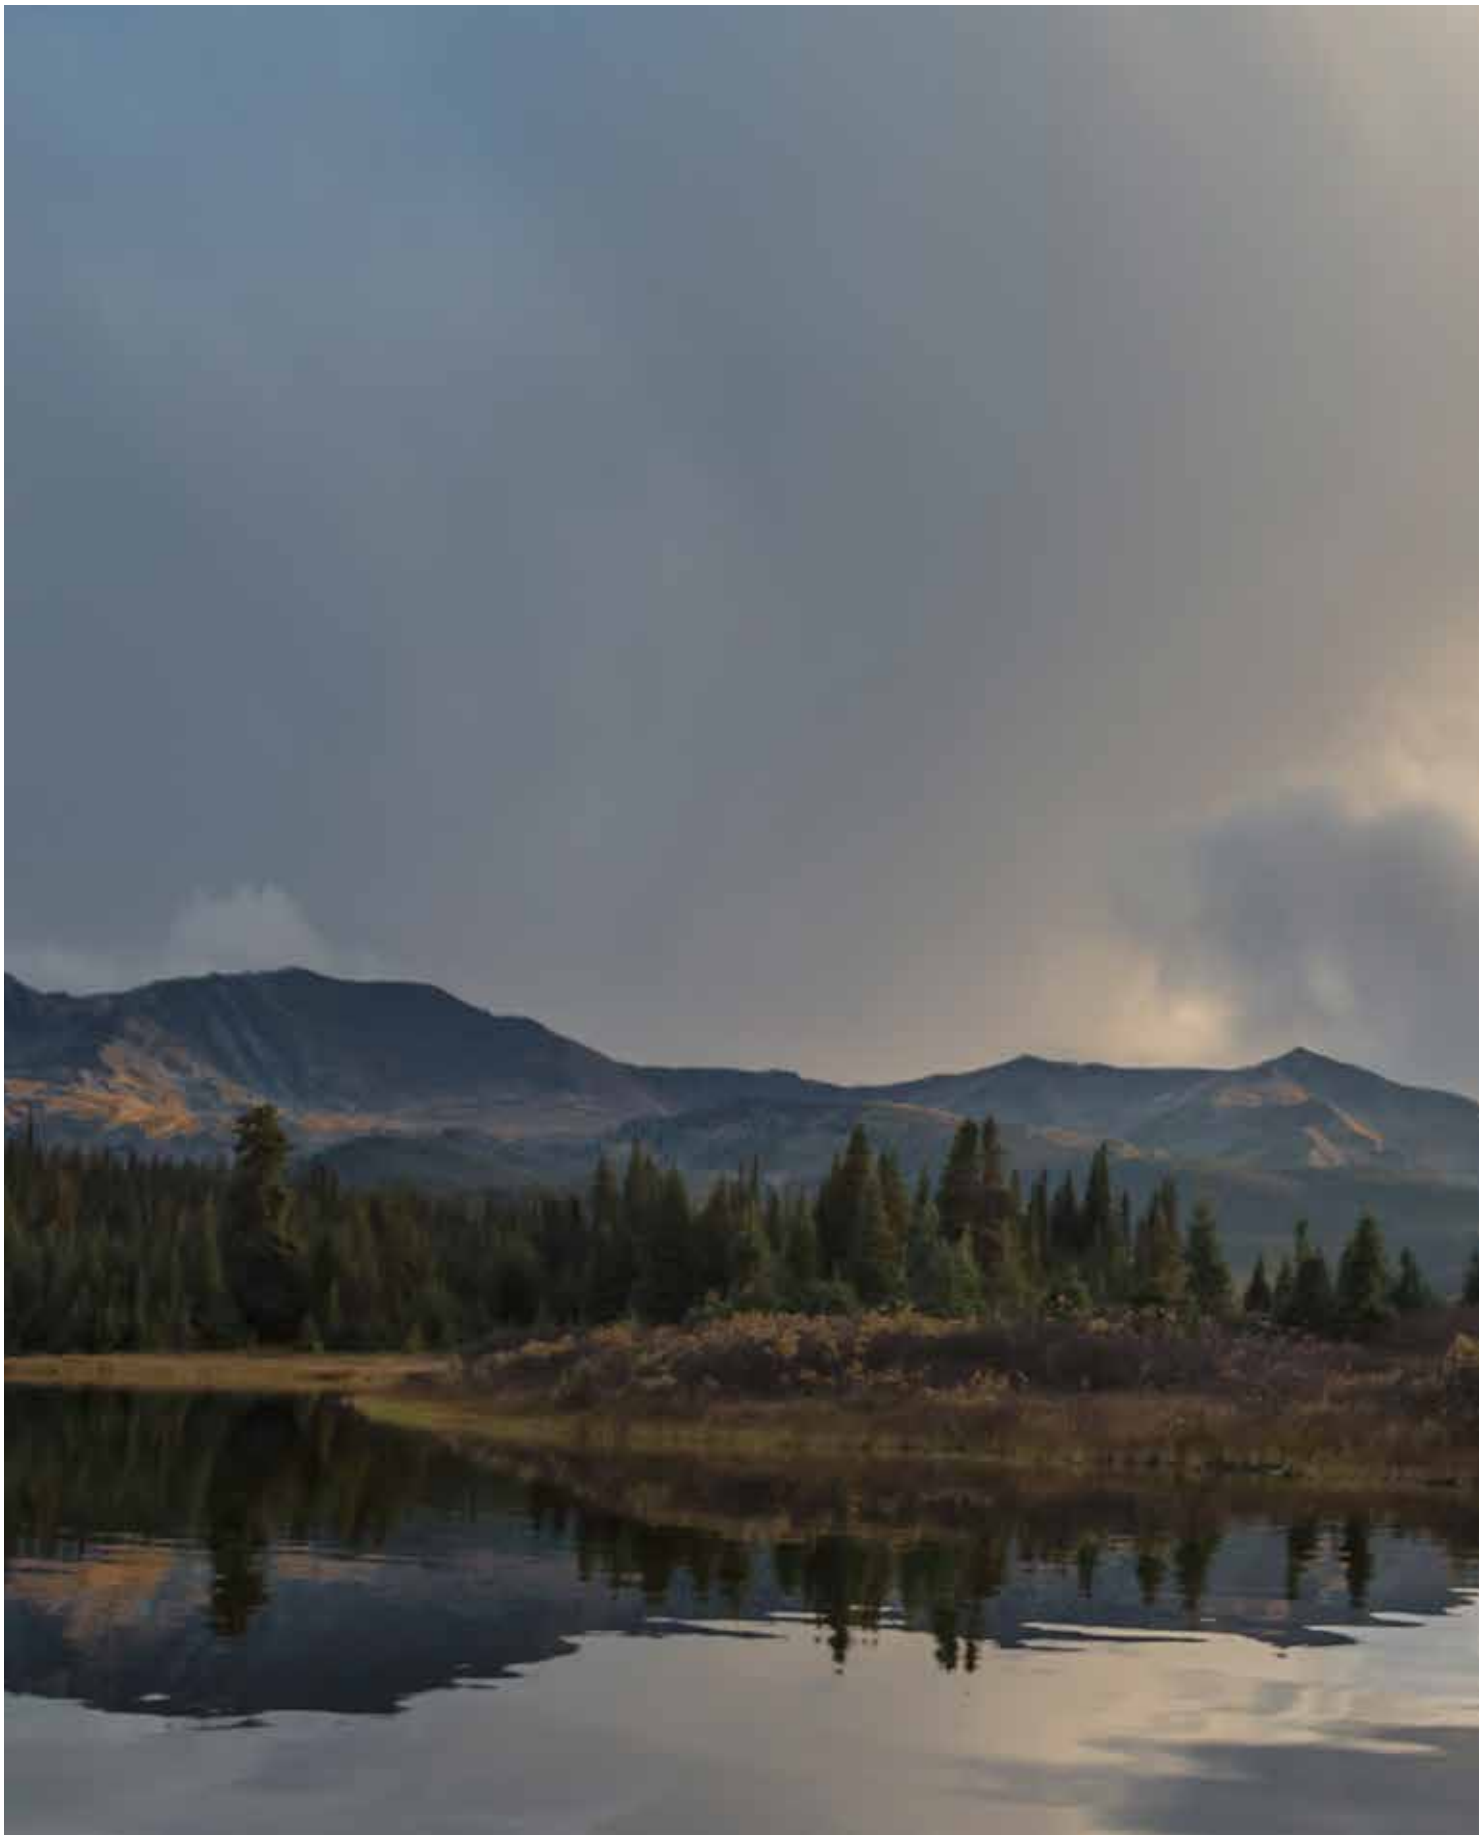
ZEISS VICTORY SF

Uncompromising versatility

The objective was clear: to build **the most versatile binoculars in the history of ZEISS**. Binoculars that prepare you for any hunting situation and therefore lead to success. What began as a vision, became reality with the ZEISS VICTORY SF. Never before in the company's history has there been a pair of binoculars that delivered such **balanced optical excellence.**

"We make it visible" is far more than just a slogan for ZEISS hunting products. It is the aspiration – the vision – that makes the company what it is. The motor that has driven the company for 165 years and counting is its overwhelming **passion for innovation.** ZEISS creates product benefits that make all the difference in practice and decide over success and failure. The new ZEISS VICTORY SF embodies the legendary quality that the company stands for: **unparalleled leading-edge optics.**

Read on and discover how the company's passion for excellence is embodied in the ZEISS VICTORY SF to make them the company's most versatile binoculars ever.



FEATURES
PRECISION

Brighter
Unique visual experience

Take a new look at the world with the most versatile premium binoculars in the company's history: the new ZEISS VICTORY SF delivers high-contrast, bright images that allow you to see even the finest details in poor light – regardless of when and where you are hunting. Light transmission of 92% enables you to master any challenges faced in the twilight. Furthermore, the highly innovative **ultra-fluoride lens system** provides maximum resolution coupled with extreme detail rendition. Multiple fluoride lens elements made of high-quality SCHOTT glass ensure even better colour rendition and brilliance. A seven lens element eyepiece featuring a field flattener generates excellent image definition right out to the edge.

Unhampered
Maximum wearing comfort

Sometimes, you have to work hard to experience something unique while hunting. Stalking for long periods, steep climbs or fatiguing day-long hikes in the quest for a hunting challenge are more the rule than the exception. The ultra-light design and the use of innovative materials on the ZEISS VICTORY SF result in unique wearing comfort: tipping the scales at only 780 grams, you hardly notice they’re there. Even on rocky terrain when the challenges on man and material reach their peak, you can trust in the ZEISS VICTORY SF as the most versatile premium binoculars in the company’s history.

Further
Unparalleled field of view

With the ZEISS VICTORY SF, you won't miss out on even the finest details. The extremely large wide-angle fields of view enable you to sight game considerably faster than ever before. The first time you look through the product, you will experience just how impressive the fields of view on our ZEISS VICTORY binoculars truly are. Both ZEISS VICTORY SF products will impress with unparalleled performance: with its 120 m (at 1,000 m) field of view, the 10x42 delivers absolute top values, just like the 8x42 with its sensational 148 m field of view. To top it off, the unbelievably wide fields of view featuring stunning edge definition can be fully utilized without annoying distortions thanks to the **ZEISS Field Flattener technology.** Experience hunting and all that it has to offer every time, without missing a thing even in the most difficult hunting situations.

More Ergonomic
Longest observation

The ZEISS VICTORY SF are the optimal binoculars for those extra-challenging hunts. They fully demonstrate their quality wherever you may be – the mountains, stalking game or anywhere that binoculars are intensively used. Decisive for comfortable observation with the ZEISS VICTORY SF is the centre of gravity far behind the eyepiece. This means the binoculars move on their own towards your eyes where they rest as light as a feather for fatigue-free observation. Traditional binoculars are heavier in the front, resulting in more stress and strain on the upper and lower arms. The innovative **ErgoBalance concept** is thus an outstanding product benefit, which significantly improves handling in the field and enables observers to become one with their binoculars and their environment.

Faster
Rapid focusing

Fast and intuitive operation of the binoculars is vital to a hunt. Intuitive means not only simple, but first and foremost fast and precise. Being able to quickly focus on game is essential, especially while stalking or in uneven terrain. The **SMART FOCUS concept** turns your hands into an extension of your senses. The focus wheel is positioned in the new **triple-link bridge** which enables you to comfortably place your finger on it. This revolutionary relaxing and natural motion allows you to observe for longer periods without getting fatigued. Experience the SMART FOCUS concept on your next hunt and make use of every opportunity, however fleeting it may be, for surefire success every time.

Brighter
Unique visual experience

- Experience even the finest details: fluoride glass from SCHOTT.
- Natural colour rendition and brilliant details: ultra-fluoride lens system.
- Bright, high-contrast images for long observations into the twilight: impressive 92% transmission.

Unhampered
Maximum wearing comfort

- Feather-light design and ultra-light magnesium materials.

ZEISS VICTORY SF

The most versatile binoculars from ZEISS

More robust
Supreme durability

- Stable, ergonomic design: triple-link bridge.
- Highest-quality workmanship and the latest materials.
- Made in Germany.

Faster
Fast focusing

- Faster, razor-sharp images at varying distances: SMART FOCUS
- Precise operation with a natural movement: optimally positioned, easy-grip focus wheel.

Further
Unparalleled field of view

- Better overview for more success thanks to unparalleled wide fields of view: 148 m at 1,000 m with the ZEISS VICTORY 8x42.
- Excellent edge definition despite wide fields of view: ZEISS Field Flattener technology.

More Ergonomic
Maximum observation

- Revolutionary handling for fatigue-free observation over many hours: innovative ErgoBalance concept with centre of gravity near the eyepiece and lightweight ultra-fluoride system

ZEISS VICTORY SF

Model overview and specifications

ZEISS VICTORY SF 8x42

New

8x42 stands for a maximum overview and fascinating, high-contrast images. With a field of view of 148 m/1,000 m, the 8x42 delivers the largest possible overview and leaves nothing undiscovered. At moderate magnification, it enables long observations with unparalleled steady images. The uniquely large fields of view and the revolutionary handling make these binoculars a perfect companion when a fast overview is vital in uneven terrain.

ZEISS VICTORY SF 10x42

The 10x42 provides maximum detail recognition and is perfectly suited for eventful observations at long distances. The field of view of 120 m/1,000 m at 10x magnification is a dream come true for many people. The 10x magnification delivers unexpected precision and crystal-clear details. The ErgoBalance concept enables steady handling despite the high magnification.

ZEISS VICTORY SF multifunctional pouch – perfection down to the last detail

Twice as nice: the ZEISS VICTORY SF is always securely stowed and protected by a magnetic latch and zipper – during transport or on a hunt in demanding terrain. In the ready mode, the accompanying pouch allows you to intuitively and quickly grab your binoculars.

ZEISS VICTORY line

Unlimited options

ZEISS VICTORY HT

The brightest premium binoculars from ZEISS

The ZEISS VICTORY HT is the specialist for reliable aiming on a hunt in poor light. With light transmission of 95% thanks to the SCHOTT High Transmission (HT) glass, hunters receive maximum image brightness and razor-sharp contrast. In particular, the new 54 mm lens diameter makes these binoculars a true revolution: never has there been lighter and more compact night hunting binoculars.

Thanks to the ultra-bright HT concept and a weight of just around 1,000 g, it is brighter than any standard 56 mm lens binoculars and as light as the 50 mm lens. The ZEISS VICTORY HT and VICTORY SF binoculars complement each other perfectly: the ZEISS VICTORY SF is ideal when stalking or sitting game in the twilight, or on trips. The ZEISS VICTORY HT excels when hunting in adverse light.

ZEISS VICTORY SF

The most versatile hunting binoculars in 165 years

The ultimate all-rounder: thanks to the brilliant images, ultra-light design, unparalleled wide fields of view and perfected ergonomics, these binoculars are ideal for even the most demanding hunts – whether you are stalking over long periods, a challenging hunt abroad or sitting game. With a fully new design featuring a triple bridge and unbeatable performance, the ZEISS VICTORY SF is taking binoculars to new heights in optical excellence and ergonomics. ZEISS and pioneering innovations belong together just as the ZEISS VICTORY SF and technologies such as the Ultra-FL concept, ErgoBalance concept, SMART FOCUS concept and Field Flattener technology.

Laser rangefinding up to

1200 m

ZEISS VICTORY RF

The most precise binoculars from ZEISS

See, measure, hit – the ZEISS VICTORY RF rangefinders turn long-distance shots into a simple formula for success. The ZEISS VICTORY RF puts all key elements at your fingertips: the laser rangefinder enables fast range measurements. In less than half a second, you reliably and precisely determine the distance to the target by releasing the one-touch button. Measurements can be made at distances up to 1,200 meters – a true advantage when shooting in unknown and uneven terrain. Combined with the bullet drop compensator (BSC/ASV) and ballistic reticle from ZEISS, the ZEISS VICTORY RF models are unbeatable: the binoculars measure and the riflescope bridges the distance. The ZEISS VICTORY RF rangefinder is a high-tech optoelectronic tool specialized for hunting at long distances.
